

Miele

Intuitive technology – designed around you

March 2023 edition

Miele. Immer Besser.

Our pledge

Immer Besser

Welcome to Miele

When our two great grandfathers founded the Miele company, they had to make sure they stood apart from the competition in order to be successful. There are effectively only two ways of doing this: either by being cheaper than the rest or by being better. It is not really possible to be both at the same time. They decided to be better than the rest.

Numerous best in class awards and certificates attest to the fact that Miele has continued to renew its commitment to being „Immer Besser“ throughout the past 120 years. However, the millions of satisfied customers around the world are perhaps the most important endorsement. At the heart of this success lies a continuity of values and goals which are typically only found in companies which have been family-run for generations.

It is in this sense that Miele has embodied first-class product quality and German engineering since 1899.

Miele also stands in equal measure for respect, fairness and mutual esteem towards sales partners, customers, suppliers, employees and neighbours.

Buying a Miele appliance is also an environmentally friendly decision. We ensure this by using methods of production that save resources as well as by producing appliances which set new standards in terms of their consumption of electricity, water and detergent – and save you money at the same time.

As co-proprietors and executive directors of the fourth generation of our business we promise you that this will not change.

Kind regards,

Markus Miele

Reinhard Zinkann

Dr. Markus Miele &
Dr. Reinhard Zinkann

Quality ahead of its time.

Your needs are the DNA of our appliances.

In order to create long-lasting reliability, we combine constant innovation with expert craftsmanship – the meticulous devotion to detail that makes sure our machines are built to last and to answer your every need.

That's why our kitchen appliances are designed to work intuitively together, to make every task seamless and effortless. Whether it's laundry, dishwashing, cooling, kitchen appliances or floor care, everything we do is to improve your household experience.

Longevity is the ultimate sustainability

Sustainability

Imagine, instead of using many appliances over the years – just using one. One that uses less water, less energy. So you consume less. And do lasting good.

Performance

Whilst some car engines are tested for 3.000 hours, we check our performance with up to 10.000¹⁾. Day and night. Comprehensive and precise. That's why you can completely rely on our products.

¹⁾ For more information: www.miele.co.uk/20years

Craftmanship

Since 1899, we've never been satisfied with the best. For us, every ground-breaking innovation is more than a cause for celebration. It is a challenge to create something even better. That's why we craft our own parts, forge our own iron. Even make the machines that make the machines. We call it: Immer besser.

Intuitive technology – designed around you.

Miele kitchen appliances are created to work intuitively together to make your kitchen experience seamless and effortless.

Cutting edge technology in a broad range of appliances, with ground-breaking features, colors and design lines to create the perfect match for your every need.

With our innovative system Miele@home, all intelligent Miele appliances can be networked simply and securely. That way you can make use of the full potential of your appliances – turning your smart home even smarter.

Built-in kitchen appliances from Miele

Intuitive technology – designed around you

For more than 120 years, Miele has been the vanguard of domestic appliances that continuously set new standards in terms of performance. Miele's built-in appliances are developed so that you can freely unleash your true creativity while cooking. This is quality ahead of its time.

Discover the **most revolutionary innovations** we have ever developed. A completely new appliance which cooks without heat. Built-in kitchen appliances that can recognise you and interact with you. Innovations for you to cook seemingly complicated dishes **perfectly, successfully and repeatedly** with ease. Discover cooking, frying, steaming and baking on a new level.

The world-renowned Japanese floral artist Azuma Makoto and the award-winning top chefs Helena Rizzo, Gaggan Anand and Kyle Connaughton form a unique team. They took on the challenge of finding out what level they could raise their cooking style to using the new Miele built-in kitchen appliances – while drawing inspiration from Azuma's artistic ingenuity. This resulted in these four experts accomplishing creations of a **new artistic and culinary dimension**. Let your creativity run wild too with Miele's intuition.

Azuma Makoto, artist

Most precise results when cooking

Miele innovations

From the built-in steam oven to the Gourmet drawer, Miele appliances have been setting new standards for decades. And from now on we will take them to a new level with our current built-in kitchen appliances. This range features numerous innovations that no modern kitchen should be without.

With the Dialog oven, we have invented a whole new way of cooking. The M Chef technology cooks the entire volume of the food from the outset, rather than working from the outside in. This means you can actually cook a fish in a block of ice without the ice melting. This unique technology will inspire amateur cooks and top chefs alike and turn their creativity into true magic.

The conventional ovens also come with a number of new functions to give you more freedom when cooking. TasteControl, for example, opens the oven door automatically to prevent the food from carrying on cooking beyond the perfect degree of doneness, so you can relax and take care of your guests.

And thanks to FoodView, you can keep an eye on your food via a camera in the oven even when you're not at home. The temperature and time can be conveniently controlled via the Miele app.

**Exclusive
to Miele**

These innovations and many more – all developed in-house and awarded the “Exclusive to Miele” seal of quality – can be found in more detail in the following chapters.

Repeatable perfection

Miele built-in kitchen appliances mark the beginning of a completely new era of intelligent technology. With functions such as MotionReact and the easy-to-use M Touch display, you no longer have to adapt to your kitchen, your kitchen adapts to you.

MotionReact / INNOVATION

Only Miele built-in kitchen appliances are so intuitive that they respond to your sheer presence. As you approach your oven, for example, it switches on the lighting and display and switches off the end of programme buzzer. Once again, we make sure that nothing will disturb your rhythm.

M Touch display / INNOVATION

Thanks to the M Touch display, a self-explanatory and intuitive user interface, our built-in kitchen appliances are easier than ever to use. Many functions can be selected by tapping them. The bright display immediately appears on a dark background – which is easy to read at any time of day or night.

Good taste

Starts with design

We take inspiration from Oscar Wilde, who said “I have the simplest of tastes. I am always satisfied with the best”. This is the principle on which our new built-in kitchen appliances are based: a strikingly clear design with no distracting features – and absolutely no complicated controls. Available in 5 design lines – be inspired and find the perfect appliance design for your kitchen.

ArtLine design line

Fully streamlined | Handleless | Perfectly integrated

Colour options:

Brilliant white | Graphite grey | Obsidian black

VitroLine design line

Consistent design in glass | Timeless | Modern
 Colour options: Brilliant white | Graphite grey | Obsidian black

PureLine design line

ContourLine design line

Classic interpretation | High proportion of stainless steel | Functional

BlackLine design line

Consistent design in glass | Striking handle | Modern

Flexibility

To suit all tastes

However you arrange your appliances, they will always be in perfect harmony.

The perfectly coordinated appliance fronts create a harmonious appearance, no matter where you place the individual appliances, giving you more flexibility while ensuring a consistent kitchen design.

You can combine appliances horizontally in a panoramic design, vertically in a tower design, in a T-shaped design or centrally in a CubiQ design. Whatever your space and usage requirements, there will be an option to suit you.

Tower design **Perfect vertical arrangement**

Conventional oven, steam oven, combination appliance or Gourmet drawer: the tower design provides an effective arrangement for your appliances and ensures good usability.

CubiQ design **Concentrated combinations**

Providing the best view: the square arrangement concentrates your passion for cooking into one area – and ensures your appliances are at a convenient operating height.

T-shaped design **Open for everything**

Room for more? Five appliances can be arranged symmetrically with the T-shaped design. This leaves plenty of space alongside and above the appliances for your kitchen cabinets.

Panoramic design

All in a line

Horizontal arrangement at eye level gives you the best view of all appliances and ensures convenient access. Aesthetically appealing: the elegant line in your kitchen design.

Control systems A simple touch

Intuitive operation at the touch of a fingertip is now possible in four of our five different variants: M Touch and M Touch S offer touch displays. DirectSensor and DirectSensor S appliances are operated via sensor controls and a clear text display. The display language can be changed to suit the user in question. Our EasyControl variant is operated using classic controls. The different operating systems all draw on the same design concept, which is characterised by clarity, longevity and high-quality details.

A touch of ingenuity.

M Touch – maximum elegance meets maximum convenience

The innovative full touch display offers unbeatable aesthetics and convenience: control your appliances quickly and intuitively by touching or swiping the display. Many functions can be selected with a single touch of a fingertip. Text and icons are always clearly visible. New: colours can be switched to a light version – ideal if you are using a white appliance.

M Touch S – sophisticated appearance and function

Our tried-and-tested M Touch technology is also available with a narrower display – while still providing all the same functions.

DirectSensor – direct selection plus four-line clear text display

Sensor controls enable options such as the operating mode to be selected directly. Further functions and settings are shown on the four-line clear text display.

DirectSensor S – direct selection plus single-line clear text display

Sensor controls enable options such as the operating mode to be selected directly. Further functions and settings are shown on the single-line clear text display.

EasyControl Plus

The non-retractable controls now include a menu button below the display for improved navigation. The right-hand control is able to combine temperature, time setting and navigation. Easy to control and more intuitive.

Miele@home

Connected Home with Miele@home*

The product highlights of Miele@home

Cleverly networked: with our innovative Miele@home system, you can exploit the full potential of your Miele appliances and make your everyday life even smarter. All intelligent Miele domestic appliances can be networked conveniently and securely. Operation is simple – whether you use the Miele app, voice control or integration into existing Smart Home solutions. The appliances are networked via a home WiFi router and the Miele Cloud.

Miele app**

Your perfect companion: with the Miele app, you can always keep track of your Miele domestic appliances. For example, would you like to keep an eye on the cooking process in the oven or find out whether the wash programme has finished? The app provides you with all the necessary information and is fast and convenient to operate. Moreover, the app also offers additional information and services for your Miele appliances, e.g. the BaristaAssistant or recipes. Download the app now!

Voice assistant***

Connect your intelligent Miele domestic appliances and operate them conveniently via voice control. You can start a programme, adjust settings or call up status reports conveniently via voice commands. You can also use a wide range of different services. And best of all, Miele voice control for your networked appliances works with Alexa. Enjoy going about your day-to-day routine and discover new contactless options.

Smart Home Integration

A Smart Home makes daily routines easier and creates individual convenience for you in your home. Shutters, heating and domestic appliances communicate with each other and are increasingly operated using apps or voice commands. Many Miele appliances can be networked, too. Thanks to the practical Miele Cloud interface, you can integrate them quickly and easily into your Smart Home partner application. This allows you to enjoy the efficiency and convenience of a holistic home network.

Connected Home with Miele@home*

The product highlights of the Miele app**

Dashboard

Always up to date: the dashboard shows the status of all networked Miele appliances.

MobileControl

With MobileControl you can use the app to operate your appliances – wherever you are.

RemoteUpdate

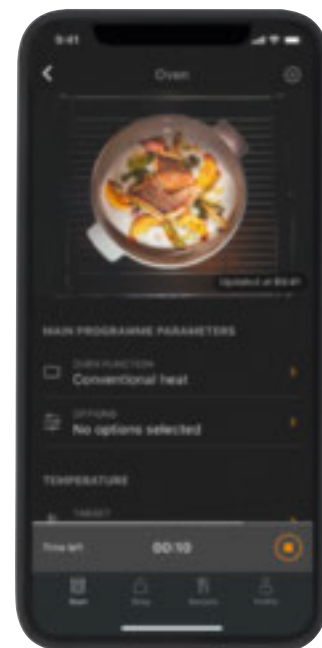

Available software updates are easily transferred and downloaded onto the appliance in question – without having to call a service technician.

ShopConnect

Order cleaning products and accessories quickly and conveniently via the app.

Demo mode

The demo mode in the Miele app provides a first impression of the advantages of the Miele app even if you do not yet have any network-enabled Miele domestic appliances.

Discover further options provided by the Miele app for your network-enabled domestic appliances:
www.miele.co.uk/c/mielehome-1326.htm

Download the app now!

* Additional digital offer from Miele & Cie. KG. All smart applications are made possible with the Miele@home system. The range of functions can vary depending on the model and the country. The system requirements for network-enabled Miele domestic appliances are available at miele.com/systemrequirements.

** Available for a mobile device. The system requirements for network-enabled Miele domestic appliances are available at miele.com/systemrequirements.

*** Voice control uses the Amazon Alexa service and is based on its availability. The range of functions can vary depending on the country.

Dialog oven

Unique: Dialog oven

The art of cooking – brought to perfection

Since our company was founded, Miele has stood for exciting innovations that redefine excellence. The Dialog oven is another mark of our desire to pursue this uncompromising standard. We are not just creating a new product – we are also establishing an altogether new category that signifies no less than a revolution in your kitchen.

Now you can effortlessly cook what others can only dream of: thanks to an intelligent and precise release of energy, the Miele Dialog oven can cook food with different cooking durations to an unprecedented level of perfection – even handling everything at the same time. It offers a totally new range of ways to let your culinary fantasies run wild. Enjoy the hearty fragrant aroma and the first-class taste of cod – cooked to perfection! Or an evenly cooked and succulent fillet of beef. Or bake bread or rolls without a crust.

The Miele Dialog oven allows you to experience the benefits of preparing food to a level of quality found in top-star rated culinary establishments right in your own kitchen, and enjoy the art of cooking at its very best.

Innovative cooking

M Chef technology – a real game-changer

Superlatives are impossible to describe – they have to be experienced. The groundbreaking M Chef technology used in the Miele Dialog oven opens doors to a previously undiscovered dimension of food preparation. With the aid of sensors, the appliance communicates with the food every ten seconds. This means that the Dialog oven can simultaneously cook a range of foods – such as meat, fish or bread – to sheer perfection. Furthermore, the revolutionary M Chef technology now makes dishes such as a veal fillet in a beeswax coating possible for the first time. The entire cut of meat is cooked at the same time, rather than from the outside in as with other conventional cooking methods. This gentle cooking method prevents the beeswax coating from melting and the veal fillet becomes tender and juicy.

Excellence

Nothing but perfection

When outstanding produce comes together with the very highest standards of preparation, the result is a level of enjoyment that is unsurpassed. This is the hallmark of the noble art that is cuisine. With the Miele Dialog oven, you can enjoy a standard of quality found in top-star rated culinary establishments right in your own home – and do so every single day. While conventional heat only penetrates the food slowly from the outside in, the Miele Dialog oven with M Chef technology ensures even cooking of the entire dish from the outset. This makes meat taste succulent throughout, and creates impressive fish and seafood dishes with an even finer texture. And when it comes to baking, you'll find that even more culinary delights await. Whatever you wish to make, be it a rustic farmhouse loaf or sophisticated cake mixtures – the Miele Dialog oven not only ensures a larger increase in volume and improves the structure of the dough, but also creates a crust and browns food entirely to your taste.

Simplicity

Spend less time in the kitchen and more time with your guests

Not only is the Miele Dialog oven setting standards through its unique functions, but its intuitive operation is also winning over users – with the option of simply controlling the appliance using a smart-phone. With MobileControl, you can send recipe settings directly to the Miele Dialog oven and keep an eye on the cooking process at all times.

Now you can effortlessly conjure up elaborate menus consisting of multiple components. Thanks to the M Chef menu automatic programmes, you can focus all your attention on your guests, safe in the knowledge that your food will be a hit. At all times, the Miele Dialog oven monitors the process so that all food items are cooked to perfection at the same time. You can look forward to sophisticated dishes such as salmon on a bed of chard and freshly baked brioche – all prepared at the same time.

Speed

Good taste is not a question of time

There is one further ingredient that makes the Miele Dialog oven truly unique, and that is time. While complicated dishes have previously been associated with lengthy preparation and cooking durations, the unparalleled technology achieves at least the same level of quality in noticeably less time. Succulent, melt-in-the-mouth pulled pork normally needs to be slow-cooked for between 8 and 16 hours in order to acquire its incredible taste. Just imagine getting exactly this result – after a mere two and a half hours.

This gentle technology also has particular advantages when defrosting. Your frozen food is quickly and evenly defrosted and meets the same standards of quality as fresh ingredients.

Fully equipped for gourmet results

The unique product features of the Miele Dialog oven

Exclusive to Miele M Chef

Cook like no one has done before: the revolutionary M Chef technology cooks the entire volume of the food from the outset and heats it all evenly. This is achieved by supplying energy by means of electromagnetic waves and measuring the amount of energy already absorbed at the same time, which is displayed in the form of Gourmet Units. At the same time, the cooking process is monitored and adjusted constantly. Combine the innovative M Chef technology with conventional operating modes to suit your individual requirements. This allows you to prepare dishes that wouldn't have been possible before.

Exclusive to Miele Gourmet Pro

Set all parameters according to your preferences – and your dishes will be cooked exactly as you like them.

Exclusive to Miele Gourmet Assistant

Expert advice: the Gourmet Assistant suggests suitable settings for cooking your food.

Exclusive to Miele M Chef menu

A menu cooked to perfection: different foods can be perfectly cooked simultaneously, and are all ready at the same time – for first-class results every time.

Exclusive to Miele Gentle defrosting

Uniform and fast: thaw food gently – without loss of quality and in the shortest possible time.

Miele@home

Make your life smart: thanks to Miele@home, you can cleverly network your domestic appliances – for more options.

The right setting for every recipe

The operating modes of the Miele Dialog oven

M Chef + Fan plus

Perfectly soft and light: ideal for even quicker and more gentle baking, roasting and cooking.

M Chef + Conventional heat

For the classics: traditional baking and roasting recipes, perfectly cooked in no time at all.

M Chef + Intensive bake

Ideal for moist toppings: pizza, quiche or fresh fruit flans – crispy base, moist on top.

M Chef + Moisture plus

Unparalleled delights thanks to the addition of moisture: crusts browned to perfection and succulently tender fish – with time savings.

M Chef + Auto roast

Cook meat quickly and succulently: the meat is seared at a high temperature, then roasted at a set temperature.

M Chef + Fan grill

Crisp outside, succulent inside: ideal for rolled meat, poultry and many other meat dishes with a reduced cooking duration.

M Chef + Full grill

For intense flavour: time-saving grilling of larger quantities of sausages, kebabs, vegetables, etc.

Automatic programmes

Conjure up over 100 dishes with ease: M Chef menu, bread, cakes or meat – the cooking process is regulated fully automatically.

Gentle defrosting

Your frozen food is evenly defrosted and meets the same standards of quality as fresh ingredients.

Fan plus

Perfectly soft and light: ideal for quick and gentle baking and roasting on up to two levels.

Conventional heat

Multi-purpose, classic function: perfect results for all traditional baking and roasting dishes.

Intensive bake

Crispy bases, delicious toppings: pizza, quiche or fresh fruit flans – crispy base, moist on top.

Moisture plus

As if fresh from the bakery: moisture ensures an incredibly light dough and a nicely browned crust.

Auto roast

Meat remains tender and succulent: the meat is seared at a high temperature, then roasted at a set temperature.

Fan grill

Crisp outside, succulent inside: ideal for chicken, duck, pork knuckle, rolled meat and many other meat dishes.

Full grill

Versatile function: for grilling larger quantities of sausages, kebabs, vegetables, etc.

Economy grill

Designed for small quantities: ideal for small amounts of food such as sausages and grilled vegetables.

The right setting for every recipe

The operating modes of the Miele Dialog oven

Top heat

Perfect finish: for a perfect topping when cooking gratins, baking toppings and browning.

Bottom heat

Individual requirements: for cooking food in a bain-marie or for browning from underneath.

Special applications

For rarely used food preparation methods: user convenience with various special programmes such as proving dough.

Low temperature cooking

For perfect results: this method brings out the best in any type of meat – automatically.

Ovens

The construction type

Ovens

Our ovens provide more flexibility in the design of your kitchen: they can be installed independently of the hob – for example, directly at eye level. This offers ergonomic benefits and makes it easy to remove food from the oven safely.

At eye level or below the hob

Size range and cleaning systems of Miele ovens*

Size range

Our compact appliance
60 cm wide, 45 cm high

Our large appliance
60 cm wide, 60 cm high

Our extra large appliance
90 cm wide, 48 cm high

49 litres, 3 shelf levels

76 litres, 5 shelf levels

90 litres, 3 shelf levels

Cleaning systems

The food – simply delicious. But what about the cleaning? Miele offers two different systems which make cleaning extremely simple: PerfectClean and pyrolytic cleaning.

**Exclusive
to Miele**

PerfectClean

Making cleaning a breeze. The oven compartment features a unique non-stick surface finish – so food residues and stubborn soiling can be easily wiped off with soapy water. This cuts down on cleaning so you can spend your time on more important things.

Pyrolytic cleaning and PyroFit accessories*

It couldn't be more convenient: at high temperatures, the pyrolytic cleaning system removes all food residues from the oven compartment surfaces and turns it into ash – your oven cleans itself! Thanks to PyroFit, baking and roasting racks, side runners and FlexiClip runners are also cleaned during this process. The ash can then be easily removed from the oven floor with a cloth.

* depending on model

Which convenience features would you like?

The product highlights* for Miele cookers and ovens

**Exclusive
to Miele**

Moisture plus¹⁾

Professional results can be achieved very easily with the help of moisture: when cooking with Moisture plus, bursts of steam are injected into the oven compartment. Various operating modes are thus combined with humidity – for the best possible baking and roasting results. Meat becomes tender and juicy with a delicious crust. Bread rolls and bread are light, evenly browned and crispy on the outside, tasting as though they were fresh from the bakery. Particularly convenient: you can programme the times when you want the bursts of steam to occur, which provides great flexibility. Various automatic programmes also use Moisture plus to achieve the best results.

Automatic programmes

Conjuring up delicious dishes with ease: whether bread, cake or meat – the cooking process is fully automated.

**Exclusive
to Miele**

TasteControl²⁾

The automatic TasteControl function prevents food from continuing to cook and can, if desired, keep the food warm.

**Exclusive
to Miele**

Camera in the oven compartment

Always keep an eye on the cooking process. Smart, innovative solutions using the integrated camera in the oven compartment.

**Exclusive
to Miele**

Wireless food probe

Cook fish and meat with perfect precision: the time left display lets you know when your food will be ready.

Miele@home

Make your life smart: thanks to Miele@home you can cleverly network your domestic appliances – for more options.

* depending on model

¹⁾ With patented water intake function

Patent: EP 2 190 295 B1

²⁾ Patent: EP 1 714 083 B1

The right setting for every recipe

The operating modes* of Miele built-in cookers and ovens

Fan plus

Perfectly soft and light: ideal for gentle baking and roasting on up to two levels.

Conventional heat

Multi-purpose, classic function: perfect results for all traditional baking and roasting dishes.

Intensive bake

Crispy bases, delicious toppings: pizza, quiche or fresh fruit flans – crispy base, moist on top.

Auto roast

Meat remains tender and succulent: meat is seared at a high temperature, then cooked at a lower roasting temperature.

Fan grill

Crisp outside, succulent inside: ideal for chicken, duck, pork knuckle, rolled meat and many other meat dishes.

Full grill

Versatile function: perfect for grilling larger quantities of steaks, sausages, kebabs and more.

Economy grill

Designed for small quantities: ideal for small amounts of food such as steaks and sausages.

Eco fan heat

Extremely energy-efficient: oven bakes or gratins are cooked to perfection.

Sabbath programme

The Sabbath programme allows the use of the appliance even while observing Jewish customs.

Top heat

Finishing touch for the eye and palate: perfect results when cooking gratins, baking toppings and browning food.

Bottom heat

Individual requirements: for cooking food in a bain-marie or for browning from underneath.

Defrost

Gentle on frozen food: frozen food is gently defrosted under ideal conditions using cool air.

Booster function

For those who lead a busy life: if you often find yourself with very little time for cooking, you will really appreciate the short heating-up time.

Automatic programmes

Conjure up a wide variety of dishes with ease: be it bread, cakes or poultry – food is cooked fully automatically.

Low temperature cooking

Tender and succulent: meat is cooked incredibly evenly at low temperatures without drying out on the outside.

Special applications

Making the extraordinary easy: special programmes such as the drying programme produce outstanding results.

User programmes

For your favourite dishes: simply set the operating mode, temperature and programme duration for future use.

Moisture plus

As if fresh from the bakery: moisture ensures an incredibly light dough and a nicely browned crust.

Moisture plus with Auto roast

Perfect roasts: meat is seared at high temperature, then roasted at a customised temperature with added moisture.

Moisture plus with Fan plus

Perfectly soft and light: ideal for baking and roasting with added moisture on up to three levels.

Moisture plus with Intensive bake

Pizza, quiche or fresh fruit flans: added moisture makes bases crispy, while toppings stay moist.

Moisture plus with Conventional heat

Classic function: added moisture provides perfect results for all types of traditional baked and roasted dishes.

Microwave combination ovens

Three cooking functions in the smallest space

As individual as you!

The Miele compact oven with microwave intelligently combines the benefits of two powerful appliances in a single 45 cm high niche: this appliance is a fully fledged oven with a wide variety of operating modes, such as Fan plus. At the same time, it is a powerful microwave oven. You have the choice: you can use the functions separately, for example to bake delicious bread and cakes with the oven functions, or to make a quick cup of hot chocolate with the microwave function. Or you can use both operating modes together: many dishes can be prepared much more quickly by combining the conventional operating mode and the microwave operating mode – depending on the dish, you can achieve time savings of up to 30 %.

Which convenience features would you like?

The product highlights* of Miele built-in microwave combination ovens

Quick & Gentle

Perfect results in the shortest of times: the microwave power is adjusted infinitely, thanks to inverter technology. Combine conventional heat with microwave power for more flexibility during everyday cooking.

3 in 1

Choose between the microwave, oven and combination modes for perfect dishes from just one appliance.

Stainless steel oven compartment with patented linen structure¹⁾

Easy to clean: the special surface with a linen structure is scratch-proof and has a PerfectClean finish.

Automatic programmes

Conjuring up delicious dishes with ease: whether bread, cake or meat – the cooking process is regulated fully automatically.

Food probe

Cook fish and meat with perfect precision: the time left display lets you know when your food will be ready.

Miele@home

Make your life smart: thanks to Miele@home you can cleverly network your domestic appliances – for more options.

* depending on model

¹⁾ EP 1 345 474 B1

The right setting for every recipe

The operating modes* of Miele microwave combination ovens

Fan plus

Perfectly soft and light: ideal for gentle baking and roasting on up to two levels.

Conventional heat

Multi-purpose, classic function: perfect results for all traditional baking and roasting dishes.

Intensive bake

Crispy bases, delicious toppings: pizza, quiche or fresh fruit flans – crispy base, moist on top.

Auto roast

Meat remains tender and succulent: meat is seared at a high temperature, then cooked at a lower roasting temperature.

Fan grill

Crisp on the outside, succulent inside: ideal for chicken, duck, pork knuckle, rolled meat and many other meat dishes.

Grill

Versatile function: perfect for grilling larger quantities of steaks, sausages, kebabs and more.

Eco fan heat

Extremely energy-efficient: oven bakes or gratins are cooked to perfection.

Sabbath programme

The Sabbath programme allows the use of the appliance even while observing Jewish customs.

Bottom heat

Individual requirements: for cooking food in a bain-marie or for browning from underneath.

Defrost

Gentle on frozen food: frozen food is gently defrosted under ideal conditions using cool air.

Booster function

For those who lead a busy life: if you often find yourself with very little time for cooking, you will really appreciate the short heating-up time.

Automatic programmes

Conjure up a wide variety of dishes with ease: be it bread, cakes or poultry – food is cooked fully automatically.

Low temperature cooking

Tender and succulent: meat is cooked incredibly evenly at low temperatures without drying out on the outside.

Special applications

Making the extraordinary easy: special programmes such as the drying programme produce outstanding results.

User programmes

For 20 of your favourite dishes: simply set the operating mode, temperature and programme duration for future use.

Microwave

Reheat water for a cup of tea or warm up a meal: efficient convenience – fast.

Microwave plus Fan plus

Whether cakes or a Sunday roast: ideal for quick and gentle baking and roasting on up to two levels.

Microwave plus Grill

Cooking and grilling: a perfectly authentic barbecue flavour for meat, fish, vegetables and so much more.

Microwave plus Fan grill

Versatile function: for grilling steaks, sausages, kebabs, rolled meat, flash fried meat, etc.

Microwave plus Auto roast

Succulent inside, crispy outside: meat is seared at a high temperature, and cooking then continues using a low temperature.

A close-up, black and white photograph of a steam oven door. The image shows the handle and hinge mechanism on the left side of the door. The door itself is made of a dark, vertically ribbed material. The text "Steam ovens" is centered in the upper half of the image.

Steam ovens

The construction types

Built-in steam ovens

Miele steam ovens can be integrated into the kitchen design in a number of ways. Thanks to their compact construction type, they fit perfectly in all standard niches, allowing you to choose the perfect location for your Miele steam oven.

Countertop steam ovens

If there is not sufficient space for another built-in appliance in your kitchen, you do not have to do without the benefits of a steam oven. The Miele countertop steam oven sits perfectly on the kitchen worktop. Just like the built-in version, this appliance guarantees user convenience and a wide range of applications.

Which niche size is available in your kitchen and which oven compartment do you prefer?

The niche dimensions and wide range of sizes for Miele steam ovens

Construction types and sizes

Miele steam ovens come in various sizes and construction types. Choose the one which is right for your kitchen.

Classic
60 cm wide, 45 cm high

Versatile freestanding appliance
50 cm wide, 37 cm high

Models

Steam ovens
Miele steam-only ovens operate in the temperature range of 40–100 °C. Ideal for the gentle steaming of vegetables, fish, side dishes, desserts and many other types of food.

Steam technology

Exclusive to Miele **DualSteam**
Powerful external steam generator with 3.3 kW output and two steam inlet ports.

MonoSteam
Powerful external steam generator with 2.2 kW output and one steam inlet port.

The steam is generated outside the oven compartment in all Miele steam ovens. This offers considerable advantages for the cooking process: ideal steam quantity, optimum temperature, volume-independent cooking durations as well as rapid heating. And because limescale cannot build up in the oven compartment, cleaning is quick and easy.

Which convenience features would you like?

The product highlights* of Miele steam ovens

Exclusive to Miele DualSteam

Perfection to suit your taste: the Miele steam oven with DualSteam technology is the ideal complement to the oven and hob and ensures the best cooking results. Fast heat-up times, even steam distribution and optimum temperature accuracy enable convenient preparation of delicious food that is cooked to perfection. This is possible thanks to a powerful external steam generator with 3.3 kW output and the special positioning of the two DualSteam inlet ports.

Exclusive to Miele Stainless steel oven compartment, linen structure

High quality and easy to clean: our steam ovens all have a stainless steel oven compartment.

Exclusive to Miele Automatic menu cooking

Cooked to perfection: cook different types of food simultaneously with steam.

Automatic programmes

Conjure up delicious dishes with ease: whether fish, meat or vegetables, cooking is regulated fully automatically.

Sous-vide cooking

For intensive flavours: vacuum-sealed food is cooked particularly gently at low temperatures.

What do the icons mean?

All icons for Miele steam ovens at a glance

Controls

Direct selection of operating modes and times via sensor controls; information appears on a 4-line text display

Direct selection of operating modes and times via sensor controls; information appears on a 1-line text display

Selection of temperature and times via sensor controls; information appears on a 7-segment display

Oven capacities

The oven compartment has a usable capacity of up to 40 litres.

The oven compartment has a usable capacity of up to 24 litres.

Sous-vide cooking

A cooking method in which food is gently cooked in vacuum packaging.

Automatic programmes

For cooking dishes fully automatically with ease

Steam technology

Fast steam generation and uniform steam distribution via two steam inlet ports.

Steam distribution via one steam inlet port

Miele@home*

Thanks to Miele@home, you can cleverly network your domestic appliances – for more options.

* Additional digital offer from Miele & Cie. KG. All smart applications are made possible with the Miele@home system. The range of functions can vary depending on the model and the country.

Combination steam ovens

Pleasure without limits

Miele combination steam ovens

Space-saving and versatile

Miele combination steam ovens are available in DGC and DGC Pro models.

The DGC provides an introduction to the world of combination steam ovens. A fully fledged oven, it features an enamelled oven compartment plus a steam cooking function. So that you can prepare a variety of dishes in just one appliance.

The DGC Pro, meanwhile, provides numerous functions that are suitable for both everyday and professional settings. Its stainless steel oven compartment is highly durable, its HydroClean function makes cleaning a breeze – and it even comes with an innovative sous-vide function, adding another dimension to your cooking.

With the DGC, the Moisture plus operating mode allows you to add bursts of steam to the cooking process, creating more moisture – so you can enjoy beautifully soft bread with a glossy crust and succulent roasts.

And with the DGC Pro, you can adjust the cooking climate even more precisely by setting the moisture percentage and combining multiple cooking stages. The DGC Pro is able to combine moist and dry heat in a new operating mode, Combination cooking, offering three functions in a single appliance.

Size range

Our combination steam ovens come in two different sizes – there's an appliance to suit every kitchen, so you can enjoy tasty, healthy food whatever your kitchen is like.

For compact niches – 60 cm wide, 45 cm high

Ideal for installation in a 45 cm high and 60 cm wide niche or together with a 14 cm high Gourmet drawer or vacuum sealing drawer in a 60 cm x 60 cm niche. The 47 l oven capacity of the DGC Pro gives you room to prepare a variety of dishes on three shelf levels.

Our classic appliance – 60 cm wide, 60 cm high

Ideal for installation in a classic 60 x 60 cm oven niche. It can be combined with a 29 cm high drawer to perfectly fill an 88 cm high niche. With four shelf levels distributed throughout the 67 l oven capacity, the DGC Pro offers endless possibilities. The DGC has a 76 l oven capacity and five shelf levels.

Which convenience features would you like?

The product highlights* of Miele DGC combination steam ovens

Exclusive to Miele MonoSteam

With the tried-and-tested MonoSteam steam generation method (2.2 kW), the steam enters the oven compartment of your Miele appliance via a single steam nozzle. It is distributed around the food quickly and evenly, and ensures a gentle cooking process with perfect results.

Exclusive to Miele Moisture plus¹⁾

Better roasting and baking results: moisture ensures an incredibly light dough and nicely browned crusts.

Automatic programmes

Conjuring up delicious dishes with ease: be it bread, cakes or meat, the cooking process is regulated fully automatically.

Exclusive to Miele TasteControl²⁾

The automatic TasteControl function prevents food from continuing to cook or can be used to keep food warm if required.

Miele@home

Make your life smart: thanks to Miele@home, you can cleverly network your domestic appliances – for more options.

Exclusive to Miele

PerfectClean equipment

Fast cleaning: as no food residue sticks to the surfaces, cleaning is extremely easy.

* depending on model

¹⁾ With patented water intake function Patent: EP 2 190 295 B1

²⁾ Patent: EP 1 714 083 B1

Which convenience features would you like?

The product highlights* of Miele DGC Pro combination steam ovens

Exclusive to Miele DualSteam

Culinary perfection: DualSteam ensures even steam distribution and the best possible cooking results. Perfection to suit your taste: the Miele DGC Pro combination steam oven always ensures the best cooking results. Fast heat-up times and cooking durations, as well as even steam distribution, make it easier for you to prepare food – thanks to the external 3.3 kW steam generator and the special positioning of the two DualSteam steam inlets. This also minimises the loss of vitamins when cooking your food.

Exclusive to Miele Combination cooking

Pure enjoyment: perfect results when baking and roasting with a combination of dry and moist heat over multiple cooking stages, set to an exact percentage.

Exclusive to Miele Mix & Match

Fast & healthy: cook or reheat different types of food on one plate at the same time.

HydroClean

Spotlessly clean: with HydroClean, the oven compartment of your Miele combination steam oven is cleaned fully automatically.

Exclusive to Miele Automatic menu cooking

Cooked to perfection: cook different types of food simultaneously with steam.

Exclusive to Miele Motorised lift-up control panel with SoftClose¹⁾

Convenient: open and close the lift-up control panel with a touch of a fingertip to reveal the water container.

The right setting for every recipe

The operating modes* of Miele DGC combination steam ovens

Fan plus

Perfectly soft and light: ideal for gentle baking and roasting on up to two levels.

Conventional heat

Multi-purpose, classic function: perfect results for all traditional baking and roasting dishes.

Steam cooking

Gentle and healthy food preparation: cooking with steam retains many nutrients.

Intensive bake

Crispy bases, delicious toppings: pizza, quiche or fresh fruit flans – crispy base, moist on top.

Auto roast

Meat remains tender and succulent: meat is seared at a high temperature, then cooked at a lower roasting temperature.

Fan grill

Crisp outside, succulent inside: ideal for chicken, duck, pork knuckle, rolled meat and many other meat dishes.

Grill

Versatile function: perfect for grilling larger quantities of steaks, sausages, kebabs and more.

Eco fan heat

Extremely energy-efficient: oven bakes or gratins are cooked to perfection.

Bottom heat

Individual requirements: for cooking food in a bain-marie or for browning from underneath.

Defrost

Gentle on frozen food: frozen food is gently defrosted under ideal conditions using cool air.

Booster function

For those who lead a busy life: if you often find yourself with very little time for cooking, you will really appreciate the short heating-up time.

Automatic programmes

Conjure up a wide variety of dishes with ease: be it bread, cakes or poultry, food is cooked fully automatically.

Special applications

Making the extraordinary easy: special programmes such as the drying programme produce outstanding results.

User programmes

For your favourite dishes: simply set the operating mode, temperature and programme duration for future use.

Moisture plus

As if fresh from the bakery: moisture ensures an incredibly light dough and a nicely browned crust.

Moisture plus with Auto roast

Perfect roasts: meat is seared at a high temperature, then roasted at a customised temperature with added moisture.

Moisture plus with Fan plus

Perfectly soft and light: ideal for baking and roasting with added moisture on up to three levels.

Moisture plus with Intensive bake

Pizza, quiche or fresh fruit flans: added moisture makes bases crispy, while toppings stay moist.

Moisture plus with Conventional heat

Classic function: added moisture provides perfect results for all types of traditional baked and roasted dishes.

The right setting for every recipe

The baking and roasting programmes Miele DGC Pro combination steam ovens

Combination cooking/Fan plus

Perfect results: additional moisture guarantees excellent results with bread, bread rolls, meat, etc.

Combination cooking/Conventional heat

With the addition of moisture, food is cooked evenly from above and below – which makes for the perfect bread.

Combination cooking/Grill

With the addition of moisture, fish and meat with a high fat content are particularly tender and succulent when cooked – with a crispy skin or crust.

Fan plus

Perfectly soft and light: ideal for fast and gentle baking and roasting on up to three levels.

Conventional heat

Multi-purpose, classic function: perfect results for all traditional baking and roasting recipes.

Grill

Versatile function: perfect for grilling larger quantities of steaks, sausages, kebabs and more.

Intensive bake

Crispy bases, delicious toppings: pizza, quiche or fresh fruit flans – crispy base, moist on top.

Top heat

A finishing touch for the eye and palate: perfect results when cooking gratins, baking toppings and browning food.

Bottom heat

Individual requirements: for cooking food in a bain-marie or for browning from underneath.

Fan grill

Crisp outside, succulent inside: ideal for chicken, duck, pork knuckle, rolled meat and many other meat dishes.

Cake plus

Conjure up delicious cakes: perfect choux pastry and cakes as good as those from the bakery.

Special applications

Making the extraordinary easy: special programmes such as the drying programme produce outstanding results.

Eco fan heat

Saves energy and time: energy-saving ways to cook food.

Eco steam cooking

Environmentally friendly and sustainable: save energy when steam cooking your food.

Sabbath programme

The Sabbath programme allows the use of the appliance even while observing Jewish customs.

Sous-vide cooking

Outstanding enjoyment: meat, fish, vegetables or fruit cooked in a vacuum for the ultimate taste sensation.

Mix & Match

Fast & healthy: cook or reheat different types of food on one plate at the same time.

Steam cooking

Gentle and healthy food preparation: cooking with steam retains many nutrients as well as the colour and the flavour of food.

What do the icons mean?

All icons for Miele DGC combination steam ovens at a glance

Controls

Direct selection of operating modes and times via sensor controls; information appears on a 4-line text display.

Direct selection of operating modes and times via sensor controls; information appears on a 1-line text display

PerfectClean

Surface finish with non-stick effect offers unbeatable cleaning convenience

Oven capacities

The combination steam oven has a usable capacity of up to 76 litres.

Combination function

Combination of a conventional operating mode and humidity. Various options are available depending on the appliance's features.

Steam technology

Steam distribution via one steam inlet port.

Steam ovens with microwave

Steam, cook and reheat food in one appliance
Miele is the first manufacturer to successfully combine the benefits of a steam oven and microwave oven in one single built-in appliance – in the steam oven with microwave.

Do you want to be able to use as many cooking methods as possible – without having lots of different appliances installed in your kitchen?

With this innovative built-in combination appliance, Miele offers a perfect addition to your oven – a fully fledged steam oven and microwave oven in one appliance! The perfect solution for kitchens with only two available installation niches.

Which convenience features would you like?

The product highlights* of Miele steam ovens with microwave

**Exclusive
to Miele**

DualSteam

Perfection to suit your taste: the Miele steam oven with microwave is the ideal complement to the oven and hob and ensures the best cooking results. Fast heat-up times and cooking durations as well as even steam distribution make it easier for you to cook food – this is made possible with a powerful external steam generator (3.3 kW) and the special positioning of the two DualSteam steam inlets.

3 in 1

A space-saving combination: microwave functions, steam and rapid steam cooking for maximum flexibility.

Rapid steam cooking

Saves time: combine steam cooking with microwave mode for fast results without loss of quality.

**Exclusive
to Miele**

Stainless steel oven compartment with linen structure

High quality and easy to clean: our steam ovens with microwave all have a stainless steel oven compartment.

Automatic programmes

Conjure up delicious dishes with ease: whether fish, meat or vegetables, cooking is regulated fully automatically.

Quick & Gentle

Perfect results in the shortest of times: the microwave power is adjusted infinitely, thanks to inverter technology.

The construction types

Your kitchen is as individual as you are. Your appliances are just right for your space and how you prefer to do things. Miele microwave ovens are available in various models – so you can equip your kitchen perfectly for you according to your own personal taste.

Miele offers two different microwave oven construction types: built into a niche or as a freestanding appliance. Their timeless design and intelligent control philosophy blend in perfectly with your kitchen design.

Which appliance would you like?

The wide variety of Miele microwave ovens

Niche dimensions and wide range of appliance sizes

Whether you are planning a new kitchen or replacing an old appliance in an existing kitchen, Miele built-in microwave ovens can be integrated into any standard niche. You will always be able to make optimum use of the space available to you: the various appliances have differently sized oven compartments and matching turntables.

- 35 cm high, 50 or 60 cm wide
- 36 cm high, 60 cm wide
- 38 or 42 cm high, 60 cm wide
- 45 cm high, 60 cm wide

- 17 l oven compartment
- 26 l oven compartment
- 46 l oven compartment

User interfaces

Miele built-in TopControl appliances

Create a perfectly harmonised kitchen design: Miele microwave ovens with the control field at the top blend in seamlessly with other Miele built-in appliances. This means they can be placed anywhere in your kitchen. The appliance door opens downwards – as on the ovens. As the controls are positioned at the top, more space is available in the interior cabinet.

Miele built-in SideControl appliances

Our SideControl appliances – with their controls in the classic position at the side – blend in with other Miele built-in appliances as well. The built-in SideControl appliances can be combined vertically with other Miele built-in appliances or installed on their own. The appliance door opens to the side.

Operating modes

Discover the culinary wonders that are possible with a microwave oven – besides warming up and defrosting. You will be surprised by the broad range of options available with Miele microwave ovens.

Solo microwave ovens

Your Miele microwave oven can do more than you might have thought possible even in solo mode: warm a glass of milk, preserve jam, melt chocolate, cook vegetables, defrost fish or blanch almonds.

Microwave ovens with integrated grill

Even in your microwave oven, you can still achieve a crispy finish: the integrated Quartz grill will brown food quickly and conveniently after cooking. Or it can be used for roasting and grilling. It turns cheese on toast, vegetables or scampi into a crispy, grilled treat. Or you can add a delicious cheese topping to a vegetable bake for that perfect finishing touch.

Which convenience features are important to you?

The product highlights* of Miele microwave ovens

**Exclusive
to Miele**

XL oven compartment

With a usable oven compartment volume of 46 litres, our appliances with TopControl provide all the space and flexibility you need to get creative in the kitchen.

Automatic programmes

Conjure up dishes with ease: simply select the appropriate programme and the weight of the food to be cooked – the appliance will do the rest.

Quick microwave

Saves time: if you need to, you can select the maximum microwave power rating straight away.

Stainless steel oven compartment

Very efficient: the stainless steel oven compartment ensures perfect microwave distribution and is easy to clean.

Combination mode

Save time and achieve better results: in combination mode, food is cooked and browned at the same time.

EasySensor

A new spin on a classic: Miele SideControl appliances now have touch controls.

Gourmet drawers

Perfectly tailored to your requirements

Size range of Miele Gourmet drawers

Three versions of our Miele Gourmet drawers are available – for various installation situations and space dimensions – for a harmonious overall look in the kitchen.

Our classic appliance – 14 cm high, 60 cm wide

With a height of 14 cm, the Miele Gourmet drawer can be perfectly combined with a 45 cm high compact appliance such as a Miele coffee machine, steam oven, combination steam oven or compact microwave combination oven – to make the best possible use of a 60 cm high niche.

The extra-large drawer – 29 cm high, 60 cm wide

Our 29 cm high Miele Gourmet drawers provide plenty of space. They can be combined with a classic 60 cm high oven or a combination steam oven XXL to make perfect use of an 88 cm high niche.

The hybrid solution for 90 cm niches – 32 cm high, 60 cm wide

When installing two 45 cm high appliances one above the other and placing a 60 cm high appliance directly next to it, the Miele ESW 7030 Gourmet drawer perfectly fills the niche created below the 60 cm high appliance. With an approx. height of 32 cm, its front is higher than other Miele Gourmet drawers. This minimises the visible gap to the above appliance, aligning the gap between the two 45 cm high appliances.

For this installation solution, a ENB 1060 base insert should be used for an optimum gap between the two 45 cm appliances.

The ESW 7030 is also ideal for use in combination with the Miele KWT 6422 iG wine unit when there is a 60 cm built-in appliance installed directly next to it.

The product highlights* of Miele Gourmet drawers

**Exclusive
to Miele**

Low temperature cooking

The low temperature cooking operating mode is the perfect way to cook high-quality meat: this professional method gently cooks the meat at low temperatures to ensure that the flavours and nutrients are preserved. The meat will be tender, succulent and flavoursome and can be sliced as soon as the cooking process comes to an end. There is no need to allow the meat to rest first as the meat juices are evenly distributed.

Four operating modes

4 in 1: warm up cups or plates, keep food warm or cook at low temperatures.

Sensor touch controls

Elegant and easy to clean: convenient operation with state-of-the-art technology via a flush touch panel.

Push2open

Open in no time: light pressure on the drawer is all it takes.

Timer function

So you can stay flexible: the drawer switches off automatically at the end of the programmed time.

Range of applications

With the Miele Gourmet drawer you can dry herbs, prove dough, melt chocolate and much more.

Vacuum sealing drawers

Good flavour retained

The versatile Miele vacuum sealing drawer

The vacuum sealing drawer from Miele offers you a huge range of potential applications: you can maintain the quality of your food, make it last longer or prepare it for sous-vide cooking. This is all simple and straightforward: pack the food in plastic, remove the air, then create an airtight vacuum seal. For example, you can easily vacuum seal leftovers and freeze them – the nutrients, flavour and vitamins are retained much longer than with conventional freezing. Vacuum sealing prevents freezer burn, too. You also save a lot of space in your freezer. Even liquids such as soups can be vacuum sealed with no problem. Divide it into portions, store it and prepare it for culinary perfection – all with a single appliance.

For intensive flavour experiences

With sous-vide cooking, you cook your food in a vacuum sealing bag at a constantly maintained low temperature in a steam oven. It is especially recommended for the preparation of meat, fish, vegetables and fruit, because aromas unfold particularly intensively in this process. Spices and marinades combine perfectly with the food and create an excellent flavour.

Practical help for day-to-day life

Food tastes best when it is fresh. But who has the time to buy fresh ingredients every day? And what do you do when you have leftovers? With the Miele vacuum sealing drawer, you can significantly extend the storage life of your food. By extracting air and thus oxygen, freshness is retained much longer than with conventional storage in the freezer compartment or refrigerator – whether meat, vegetables or fruit.

If you like to prepare larger portions in order to eat them warmed up at a later time – e.g. a few days later – the vacuum sealing drawer ensures that you get the full taste experience as on the first day of preparation. For example, on weekends, enjoy cooking at leisure and vacuum seal individual portions and store them in the refrigerator. So you can enjoy a delicious meal spontaneously in the middle of the week after a long working day.

Miele vacuum sealing drawers

Which convenience features would you like?

The product highlights of the Miele vacuum sealing drawer

Vacuum sealing

By extracting air and oxygen, your food is optimally prepared for sous-vide cooking in the steam oven. Furthermore, you can portion, store, marinate or reseal fish, meat and vegetables particularly well in a vacuum sealing bag. Another advantage: to achieve maximum shelf life, vacuum seal food before freezing – vitamins and flavours are preserved and freezer burn is prevented. You also save space in your freezer.

Sensor touch controls

Elegant and easy to clean: convenient operation with state-of-the-art technology via a flush touch panel.

Three vacuum settings

Settings to match individual items: you can choose between three vacuum sealing levels depending on the food in question.

Push2open

Open in no time: light pressure on the drawer is all it takes.

Food-safe vacuum sealing bags

Safely packed: Miele vacuum sealing bags are temperature-resistant, airtight and do not affect flavour.

Reusable vacuum sealing containers

The sustainable alternative: unlike vacuum sealing bags, you can reuse vacuum sealing containers over and over.

What do the icons mean?

All icons for Miele vacuum sealing drawers at a glance

Controls

Direct selection of operating modes, temperatures and times via sensor controls.

Build height

Containers and bags of up to 250 x 350 mm and with a height of 80 mm can be used.

Vacuum sealing

Extracts air from the vacuum sealing bag.

Push2open

Applying light pressure to the drawer activates the automatic opening feature.

Fully telescopic runners

The drawer can be pulled out completely for easy loading and unloading.

Vacuum sealing bag support

Makes handling small vacuum sealing bags easier.

Sensor-supported assistance functions

Frying couldn't be easier

With Miele sensor-controlled hobs, your kitchen benefits from intelligent technology.

Always enjoy optimum results when frying: our sensor-supported assistance function TempControl* makes life easier for you and makes cooking even more fun. TempControl sensors can be found in numerous hobs with SmartSelect operation and in the entire cooking area of the KM 7999 with touch display.

TempControl* guarantees consistently perfect cooking results when frying and stir-frying. All you have to do is select the simmer setting or one of the three frying levels with ideal temperatures. You don't need to worry about making adjustments because the temperatures are kept at a constant level.

TempControl* provides an added level of safety in the kitchen by preventing oil and butter from overheating in the pan. And it maintains the optimum cooking temperature at all times – meaning no more burnt food. You can use the functions with any items of cookware that are suitable for induction cooking – there is no need to buy new cookware.

Miele@home

The Miele app offers a wide range of recipes specially designed for use with TempControl* and CookAssist; for example, for meat and fish dishes.

KM 7999 FL

Simmer setting

Many dishes are not complete until the sauce is added – for example, ragout or Bolognese. With the help of the simmer setting, the hob regulates the temperature perfectly. This prevents splattering, and sauces are always cooked to perfection.

Frying level I

This frying level is suitable for all dishes cooked at a low frying temperature, such as fried eggs, scrambled eggs, bacon, chicken breast, gnocchi, vegetables, meat patties, fish and most frozen dishes.

Frying level II

This medium temperature is used for stir-frying and frying food such as prawns, steaks, escalopes, meat loaf and sliced meat. It is also suitable for lightly frying seeds and preparing potato pancakes, tortilla and caramel.

Frying level III

The highest level is perfect for cooking with a wok and searing meat for stews or large amounts of meat. It also works well for pancakes and fried potatoes.

Con@ctivity

Which convenience features would you like?

The product highlights¹⁾ of Miele induction hobs

Con@ctivity

Concentrate fully on cooking: with Con@ctivity, your cooker hood always knows exactly what to do. As soon as the hob is switched on or off, the cooker hood responds automatically. The extraction power is automatically adjusted to what is happening on the hob, ensuring a pleasant room climate at all times. The appliances communicate with each other via WiFi. Con@ctivity allows you to integrate the cooker hood and hob into Miele@home.

Full-surface

Use the hob surface however you like: cookware can be placed anywhere.

**Exclusive
to Miele**

TempControl²⁾

Perfect frying results every time: the temperature of the pan is kept constant and nothing can burn.

**Exclusive
to Miele**

SmartSelect White

Quick and intuitive: power levels can be selected directly for each cooking zone.

**Exclusive
to Miele**

PowerFlex

Unbeatably fast and versatile: the booster output of up to 7.3 kW.

DiamondFinish

Robust and sophisticated: the particularly resistant and high-quality DiamondFinish coating reduces the risk of scratches.

¹⁾ Depending on model

²⁾ Patent: EP1704754, EP2153698

What do the icons mean?

All icons for Miele induction hobs at a glance

Controls

Power levels can be selected very quickly and intuitively. White high-contrast displays.

Power levels can be selected very quickly and intuitively. Yellow backlit numerical display.

All cooking zones and power levels are particularly easy to control.

All cooking zones and power levels are controlled using a central numerical display.

Con@ctivity

Indicates whether the hob is equipped with Con@ctivity.

Flexibility

Flexible use of the entire hob surface without predefined cooking zones.

An extra large area for two pots or pans, a large oven dish or a large pasta pot.

TwinBooster

Two power levels for extremely short heat-up times.

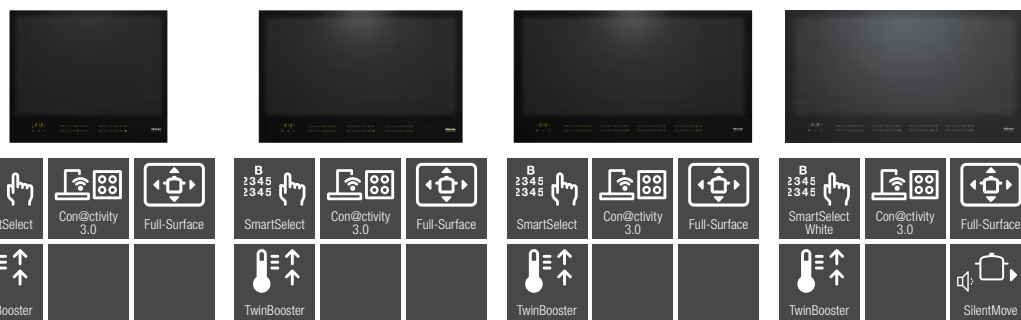

TempControl

Guaranteed consistently perfect cooking results with a variety of roasting processes.

SilentMove

Whisper-quiet sliding of pots and pans thanks to the particularly smooth surface of the ceramic glass.

Con@ctivity

Which convenience features would you like?

The product highlights¹⁾ of Miele conventional electric hobs

Con@ctivity

Concentrate fully on cooking: with Con@ctivity, your cooker hood always knows exactly what to do. As soon as the hob is switched on or off, the cooker hood responds automatically. The extraction power is automatically adjusted to what is happening on the hob, ensuring a pleasant room climate at all times. The appliances communicate with each other via WiFi. Con@ctivity allows you to integrate the cooker hood and hob into Miele@home.

**Exclusive
to Miele**

ExtraSpeed²⁾

Even more time savings: Miele's exclusive technology frees up more valuable time for you.

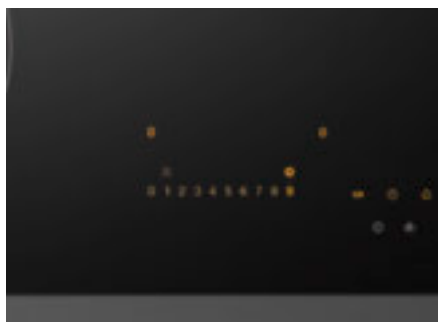

Extended zone

Extremely practical: extra heating circuits can be activated if you are using a large oven dish.

Multi-circle cooking zone

Tailored to your needs: you can activate different heating circuits depending on which size you need.

**Exclusive
to Miele**

SmartSelect

Quick and intuitive: power levels and times can be selected directly for each cooking zone.

**Exclusive
to Miele**

Keeping warm

Food kept at serving temperature: this function controls the temperature in the pan base and prevents food from burning.

¹⁾ Depending on model

²⁾ Patent: EP2001267

What do the icons mean?

All icons for Miele electric hobs at a glance

Controls

All cooking zones and power levels are controlled using a central numerical display.

Flexibility

Additional heating circuits allow the use of an oven dish.

TwoInOne hobs

Con@ctivity

Exclusive features for gourmet results!

The product benefits* of Miele TwolnOne hobs

Con@ctivity

With Con@ctivity, you can fully focus on the pleasure of cooking. This is because the cooker hood and the hob communicate with each other. The hob transmits information about its settings to the vapour extraction electronic module, which automatically adjusts extraction levels. You no longer have to remember to switch the cooker hood off after cooking. All Miele TwolnOne hobs feature Con@ctivity as standard.

Silence motor

Extra-quiet: developed by Miele, this motor is 25 % quieter than its predecessor at higher air throughput levels.

Exclusive to Miele

PowerFlex XL

Ample space: as the entire depth of the hob can be used, large cookware can be positioned perfectly.

Exclusive to Miele

TwinBooster

Unique flexibility: induction output can be individually distributed or used for one single zone.

Exclusive to Miele

ComfortSelect Plus

Compact and convenient: all cooking zones and the fan can be operated using a clear central numerical display.

Stainless steel grease filter

Convenient cleaning: the high-quality 10-ply metal grease filters are dishwasher-safe and extremely durable.

What do the icons mean?

All icons for Miele TwoInOne hobs at a glance

Controls

Cooking zones and fans are operated via a central numerical display.

Con@ctivity

Automatic function for an ideal room climate and excellent user convenience.

Flexibility

Extra large, high-power cooking zone for positioning large pots and pans behind each other or for oven dishes.

TwinBooster

Two power levels for extremely short heat-up times.

10 x filtration

10-ply metal grease filter, suitable for cleaning in a dishwasher.

Energy efficiency

The energy label tells you the efficiency and performance of your appliance.

Induction hobs with vapour extraction

SmartLine

The freedom to cook the way you want to

The right appliance whatever your style

Induction

Fast and energy-efficient: with induction cooking, the heat is generated directly in the base of the pot and the size of the pot is automatically recognised. Practically no energy is lost. Cooking is particularly safe as the areas surrounding the cooking zones stay relatively cool. In addition to versatility, the speed of the PowerFlex cooking zones is a unique feature. Because of its many benefits, induction cooking is well established in professional kitchens.

Gas

Gas is a primary source of energy. This means it is an energy form that comes from nature and does not need to undergo conversion processes before it can be used. That is why cooking with gas is particularly environmentally friendly.

Induction wok

Professional class: the Miele wok pan fits perfectly into the depression of the ceramic hob. This results in optimum heat distribution and perfectly cooked food. In addition, the wok's intelligent ControllInduc® system reliably prevents cooking oil and fat from overheating. The Miele induction wok also offers special user benefits such as booster technology.

Tepan Yaki

Modern Japanese cooking tradition: cooking with a Tepan Yaki is a culinary experience in modern kitchens. Food is cooked directly on the hot stainless steel surface. Miele's induction Tepan Yaki has two separate heating circuits: this allows you, for example, to cook food with different temperature requirements at the same time, or to keep food warm.

Countertop extractors

Cooking without unpleasant vapours and odours from food is possible thanks to the Miele countertop extractor. As it is installed in between two SmartLine elements, the Miele countertop extractor extracts cooking vapours directly from where they are produced. The countertop extractor can also be installed next to gas appliances. In this case the glass cover serves as a magnetic flame guard.

Which convenience features would you like?

The product highlights* of Miele SmartLine elements

**Exclusive
to Miele**

SmartSelect

This feature allows you to select power levels and cooking times quickly and intuitively. Each cooking zone has a numerical display with yellow backlighting. This makes the display easy to read from all angles. Timer durations are also easy to set with a separately controllable minute minder, Auto switch-off and a three-digit display.

**Exclusive
to Miele**

PowerFlex

Unbeatably fast and versatile: the booster output of up to 3.65 kW.

**Exclusive
to Miele**

TwinBooster

Unique flexibility: induction output can be individually distributed or used for one single zone.

ComfortClean pot rests

Fast cleaning: remove the pot rests and wash in the dishwasher. Keeps gas hobs looking good for longer.

Wok burner

Professional: powerful wok burner for uniform and/or separate power regulation of both flame rings.

GasStop

Reassuring: if the flame is extinguished by a draught, for example, the gas supply is stopped.

What do the icons mean?

All icons for Miele SmartLine appliances at a glance

Control philosophies

Power levels can be selected very quickly and intuitively. Yellow backlit numerical display.

Fast and simple selection of each cooking zone via a separate rotary control.

Flexibility

An extra large area for two pots or pans, a large oven dish or a large pasta pot.

TwinBooster

Two power levels for extremely short heat-up times.

GasStop

High level of safety through immediate interruption of gas supply in the event of flame failure.

10 x filtration

10-ply metal grease filter, suitable for cleaning in a dishwasher.

Energy efficiency

Indicates an A++ energy efficiency class.

Gas hobs

Type

Gas hobs

Miele gas hobs are installed independently from an oven. This enables the space underneath the hob to be used for drawers or cupboards. As a result, you benefit from more flexibility when planning your kitchen.

Construction types

Gas

Gas is a primary source of energy. This means it is an energy form that comes from nature and does not need to undergo conversion processes before it can be used. That is why cooking with gas is particularly environmentally friendly. Cooking with gas has a long tradition. The earliest gas cookers were used in the 19th century, long before electric cookers.

Perfectly tailored to your requirements

The models, construction types and size range of Miele gas hobs

Size range

Standard

60 cm wide – hobs with 3 to 4 burners

Convenient

75 cm wide – hobs with 4 to 5 burners

Extra wide

90 cm wide – extra-wide hobs with 5 burners

Design variations

Classic – gas hobs with stainless steel trough

Integrated – flat-fit gas hobs with stainless steel trough

Elegant – gas hobs with ceramic glass surround

Control philosophies

Gas hobs without electronic modules

All Miele gas hobs have the GasStop safety feature. This ensures immediate interruption of the gas supply in case of flame failure. And prevents gas escaping into the room.

Gas hobs with electronic modules

QuickStart* ensures rapid ignition and GasStop & ReStart* automatic re-ignition in the event of flame failure. Some models also feature a minute minder as well as heat and residual heat indicators.

Which convenience features would you like?

The product highlights* of Miele gas hobs

Gas hobs with electronic modules

Miele gas hobs with electronic modules are equipped with special features that offer even more safety and convenience: QuickStart** ensures fast ignition and GasStop & ReStart** automatic re-ignition in the event of flame failure. Some models also feature a minute minder as well as heat and residual heat indicators.

QuickStart**

No need to press and hold the control: convenient electronic rotary controls switch the burners on.

GasStop & ReStart**

Safe cooking: automatic re-ignition of extinguished gas flames. Should this prove unsuccessful, the gas supply is turned off immediately.

ComfortClean pot rests

Fast cleaning: remove the pot rests and wash in the dishwasher. Keeps gas hobs looking good for longer.

Wok burner

Professional: mono or dual wok burner for uniform and/or separate power regulation of both flame rings.

Versatile burner configuration

From economical to powerful: the right burner with the optimal output for every application.

* depending on model

** Patent: DE 102007015822

What do the icons mean?

All icons for Miele gas hobs at a glance

Controls

Fast and simple selection of each cooking zone via a separate rotary control.

Safety

More convenience with automatic re-ignition in the event of flame failure.

High level of safety through immediate interruption of gas supply in the event of flame failure.

QuickStart

More convenience with faster ignition of the gas flame.

Trivets

Perfect cleanliness ensured with dishwasher-safe trivets.

PerfectClean burners

Patented surface finish offers unbeatable cleaning convenience.

SmartControl – elegant touch controls

ComfortControl – effortless control

EasySwitch – select with the touch of a fingertip

The right solution for every home

Miele cooker hood operating modes

During cooking, and in particular when frying, vapours are given off which consist of a mixture of steam, particles of fat and odours. If air in the room is not extracted or filtered, these vapours will remain in the room and affect the kitchen environment. Over time, fat and vapours will settle on the kitchen furniture, soft furnishings and paintwork. Three options are available for effective cleaning of the air: extraction mode, extraction mode in combination with an external fan and recirculation mode.

Extraction mode – highly efficient and extracts vapours effectively

Extraction mode with an external fan – effective and particularly quiet

Recirculation mode – simple and energy-efficient

Diverse possibilities

Miele filter systems for recirculation mode

Miele recirculation mode cooker hoods are particularly efficient in removing odours. This is ensured by a special active charcoal filter that reliably absorbs odours. To remove odours, Miele offers various active charcoal filters that ensure clean air while cooking. The selection of filters depends on the model.

Active AirClean filter

Long-life AirClean filter

Sensitive AirClean filter

Aura 4.0 Ambient

Elegant and with smart controls

Add unique accents to your kitchen with the Aura 4.0 Ambient. This innovative recirculation cooker hood extracts and filters vapours and also comes fitted with a variety of new functions. Thanks to the Humidity-Balance moisture removal function, the hood removes moisture during the cooking process. An integrated sensor measures the room air and establishes the best time to release the moisture collected in the filter. MyAmbientLight allows the lighting colours to be customised to your individual preferences, while the AmbientFragrance function ensures the room is kept pleasantly fresh. Choose from a range of fragrances to suit your tastes. What's more, the Aura 4.0 Ambient is the first cooker hood from Miele which is operated exclusively via the Miele app.

Smart control exclusively via the Miele app

Customised lighting colours

Exclusive fragrances

Unique moisture removal function

Con@ctivity

Which convenience features would you like?

The product highlights* of Miele cooker hoods

**Exclusive
to Miele**

Con@ctivity – the automatic function for Miele cooker

hoods

Concentrate fully on cooking: with Con@ctivity, your cooker hood always knows exactly what to do. As soon as the hob is switched on or off, the cooker hood responds automatically. The extraction power is automatically adjusted to what is happening on the hob, ensuring a pleasant room climate at all times. The appliances communicate with each other via WiFi. Con@ctivity allows you to integrate the cooker hood and hob into Miele@home.

SmartControl

High-quality and functional: enjoy convenient touch controls with a yellow display.

ECO motor

Powerful and energy-efficient: the DC motor saves up to 50 % electricity compared with conventional fan motors.

Silence

Efficient and very quiet: the fan is effectively insulated with special soundproofing mats.

Miele CleanCover

Protection and easy cleaning: the smooth, enclosed surface prevents contact with cables and electrical components.

Stainless steel grease filter (10-ply)

Looks great and does a good job: effective grease filtering and easy cleaning in a dishwasher.

What do the icons mean?

All icons for Miele cooker hoods at a glance

Energy efficiency

Energy efficiency classes A+++ to B are shown.

Con@ctivity

WiFi-based automatic function for an ideal room climate and excellent user convenience.

10 x filtration

10-ply metal grease filter, suitable for cleaning in a dishwasher.

Filter indicator

Optical saturation display for grease filter and active charcoal filter.

ECO motor

Particularly efficient cooker hood.

Silence

Particularly low noise levels in the kitchen.

Coffee machines

What type of appliance would you like?

The Miele coffee machine construction types and user interfaces

The right appliance whatever your needs

Depending on your kitchen and preferences, Miele offers a choice of built-in or countertop coffee machines. So you will always find just the right coffee machine to perfectly match your needs.

Perfectly integrated

Create a uniform appearance in your kitchen: the Miele coffee machine fits perfectly into a 45 cm high niche. It can be combined with other built-in appliances – either vertically or horizontally – to create a coherent design. This allows you to make the best possible use of your kitchen space.

The built-in appliance is also available with a mains water connection. This is particularly practical as it means your Miele appliance is always ready for operation. As the coffee machine is directly connected to the fresh water supply, there is no need to fill the water container manually – saving time and providing added convenience.

The perfect coffee – wherever you want it

Practical and flexible: Miele countertop appliances are at home anywhere in your kitchen, or even in the living room or conservatory. In fact they can be placed wherever you want to enjoy aromatic fresh coffee. You can also choose between the minimalist CM7 series with CM Touch controls or the compact CM6 and CM5 appliances with DirectSensor controls.

User interfaces

M Touch

Elegant M Touch controls provide even more convenience: just like a smartphone, the appliance can be set by swiping or scrolling. This makes operation particularly easy.

DirectSensor

Thanks to DirectSensor, you can prepare your desired coffee speciality with just a touch of a fingertip – using the high-resolution TFT display.

Which convenience features would you like?

The product highlights* of Miele built-in coffee machines

The perfect coffee – a true taste sensation

Enjoy your coffee to the fullest with the top-class Miele coffee machines. Thanks to AromaticSystemFresh, the beans are freshly ground for each cup of coffee and then brewed straight away – for an intense flavour. With CoffeeSelect you will also benefit from having three separate bean containers – so each coffee speciality is always prepared with the right bean type. Furthermore, the intelligent brewing technology allows the beans to unfold their full aroma. And to round off the experience, Miele has developed its own coffee which is perfectly tailored to your coffee machine. This results in an unbeatable flavour that you can enjoy at any time of day.

Easy to use

The perfect coffee experience: intelligent functions enable you to prepare your coffee quickly and easily.

Simple to clean

Appliance hygiene made easy: removable components and automatic cleaning programmes guarantee cleanliness.

**Exclusive
to Miele**

CoffeeSelect¹⁾

Your choice: with three bean containers, your coffee speciality is always prepared with the right coffee bean.

**Exclusive
to Miele**

Automatic cleaning²⁾

Convenient and effortless: your Miele coffee machine will take care of cleaning and descaling for you.

**Exclusive
to Miele**

CupSensor³⁾

Ideal distance: the CupSensor recognises the rim of the cup and positions the central spout accordingly.

* depending on model

¹⁾ Patent: EP 2957199

²⁾ Patent: EP 2705783, EP 2705784,

Freezers

Do you want to place appliances side by side?

The flexibility of Miele refrigeration appliances and wine units

Miele refrigeration appliances are not just excellent in terms of their size range, quality and premium design – they are also known for being extremely versatile. For instance, you can combine two refrigerators next to each other or have a classic side-by-side combination of a refrigerator and freezer.

The following built-in appliances are designed for installing in a tall unit which is 60 cm wide and can be installed next to one another. The appliances do not have to be installed in any particular order, so you can decide how you want to arrange them.

178 cm niche

MasterCool

All built-in refrigeration appliances from the MasterCool series can be installed in a row in any configuration that meets your requirements. This requires a KSK 200x conversion kit, available as an optional extra, to be fitted between the two appliances.

What type of appliance would you like?

User interfaces – Miele built-in refrigeration appliances

User interfaces

User interfaces from Miele are extremely easy to use. Every refrigeration appliance features the latest control elements which combine function and design perfectly.

FreshTouch controls

Sensor touch controls

TouchControl panels

EasyControl

MasterSensor interface (MasterCool appliances only)

TouchControl panels (wine units only)

Which freshness system would you like?
Pure enjoyment and natural taste

PerfectFresh Active

More freshness is not possible: active and visible humidification in the drawer is provided by a humidifier, thus preventing moisture from being extracted from the food. Even when the drawer is only partially filled, fruit and vegetables are optimally stored. In addition to the active humidification function, this freshness system offers an automatically controlled temperature zone between 0 and +3 °C. This ensures that meat, fish and many dairy products stay fresh for 3 times longer or up to 5 times longer in the case of fruit and vegetables. Function and aesthetic appeal combined – a genuine and instant eye-catcher!

PerfectFresh Pro

Food stays fresh for up to 5 times longer. In the automatically controlled temperature range between 0 and +3 °C, meat, fish and many types of dairy products remain fresh for up to 3 times longer. Fruit and vegetables retain their freshness for up to 5 times longer – thanks to an individually adjustable humidity level on the drawer.

DailyFresh

The spacious drawers in the fridge offer space for a lot of fresh food. A good level of moisture is kept within the drawer. This results in fruit and vegetables staying fresh for up to 2 times longer. Selected models have an ExtraCool drawer in which the temperature is lower than in the rest of the refrigerator, making it the ideal place to store meat, fish and dairy products.

Which freezing system would you like?
Long storage times for greater convenience

NoFrost

With the NoFrost system, you'll never have to defrost your Miele refrigeration appliance again. The circulation cooling system distributes cold, dry air evenly so that ice cannot form in the interior cabinet. Furthermore, ice deposits do not form on your frozen food and, without layers of ice on the interior, drawers can always be opened and closed easily. NoFrost offers maximum convenience for freezing food and saves the hassle of defrosting – forever.

ComfortFrost

With ComfortFrost, the freezer needs much less defrosting. The ice inside the appliance builds up much more slowly. This saves you the effort of frequent defrosting.

DuplexCool

The fridge and freezer have separate air circuits which ensure an optimum climate in both. In addition, there is no air exchange between the two areas. This prevents odours from food such as fish, onions or cheese from being transferred to other food in the freezer. DuplexCool ensures the safest storage conditions for your food in fridge-freezers.

Which convenience features would you like?

The product highlights* of Miele built-in refrigeration appliances

PerfectFresh Active

A new approach from Miele to keep your food fresh! Every 90 minutes and whenever the door is opened, a fine water mist is sprayed into the PerfectFresh Active drawer. This creates a gentle layer of moisture on your food and keeps the air humidity perfect at all times – regardless of how full the refrigerator is. As a result, Miele's Perfect-Fresh Active freshness system creates the perfect storage conditions in your refrigerator.

PerfectFresh Pro

Long-lasting freshness: ideal temperatures and high humidity keep fruit and vegetables fresh up to 5 times longer.

**Exclusive
to Miele**

FlexiLight 2.0

Entirely glare-free: the illuminated shelves can be custom-positioned in the fridge for maximum flexibility.

FlexiTray pivotable glass shelf

Maximum convenience: the FlexiTray pivotable glass shelf allows items to be removed easily, even from a full refrigerator.

**Exclusive
to Miele**

Fine adjustment of inner door

Adaptable: the position of the inner door shelves can be adjusted to make the best use of space.

CleanSteel rear panel

Clean and cool: the CleanSteel rear panel ensures excellent cooling distribution in Miele refrigerators.

What type of appliance would you like?

The models and sizes of Miele freestanding refrigeration appliances

Appliance range

Refrigerators

Size range

55 cm wide

Fridge-freezers

60 cm wide

Freezers

70/75 cm wide

Miele freestanding appliances with particularly generous interiors offer considerably more space and convenience for storing food.

XL interior

More space for bulky items. The greater useable depth in the fridge provides sufficient space for large and bulky items; even a baking tray full of food can be chilled in the refrigerator until it is time to slide it into the oven for cooking.

XXL box

More space for bulky frozen food. The extra high freezer drawer offers noticeably more volume. This gives you more space and flexibility for frozen food.

Which exterior design would you like?

Which handle would you like?

Miele freestanding appliance opening concepts

The Miele opening concepts take into account individual customer requirements regarding design and convenience. Concealed recessed grip or elegant handle? With or without a door opening aid? Your choice!

Click2open

With Click2open, the appliance can be opened particularly easily and elegantly. Click2open disappears discreetly into the side panel of the door, providing more room for the new exterior design.

Click2open

...

EasyOpen lever handle

The elegant handle has an opening aid with lever action. The door can be opened very easily.

EasyHandle

A high-quality elegant handle emphasises Miele's premium appearance and offers the classic method of opening from the front.

SideOpen

Depending on the model, the side panel of the door offers a short or long recessed grip. The handleless, linear design blends perfectly into many different kitchen environments.

* Available from Q1 2023

Which user interface do you prefer?

User interfaces – Miele freestanding refrigeration appliances

User interfaces

User interfaces from Miele are extremely easy to use. Every refrigeration appliance features the latest control elements which combine function and design perfectly.

FreshTouch controls

FreshTouch is based on a TFT colour display with touch functions and does not require additional control buttons. All functions and features can be easily selected via the central interface, and set with the touch of a fingertip on the display.

Sensor touch controls

The sensor touch controls are based on a LCD display. Users can navigate through the various menus intuitively at the touch of a fingertip and the three touch buttons to the right of the display.

TouchControl panels

TouchControl panels offer a completely smooth operating interface with sensor controls and a precise digital temperature display. A light touch of a finger is all that is needed to select a function.

EasyControl

Easy to select: extra options can be selected simply by toggling the sensor controls. Depending on the model, EasyControl precisely sets the temperature of the fridge, freezer or both.

Manual temperature control

The temperature is set via a manual temperature control which is particularly easy to use.

Which freshness system would you like?
Pure enjoyment and natural taste

PerfectFresh Pro

Food stays fresh for up to 5 times longer. In the automatically controlled temperature range between 0 and +3 °C, meat, fish and many types of dairy products remain fresh for up to 3 times longer. Fruit and vegetables retain their freshness for up to 5 times longer – thanks to optimised humidity controls on the drawer. Furthermore, bright integrated LED lighting ensures a perfect overview of the food.

PerfectFresh

With PerfectFresh, food stays fresh for up to 3 times longer. The temperature range from 0 to +3 °C offers ideal conditions for a significantly longer shelf life of meat, fish and many dairy products. Fruit and vegetables in the humidity-controlled compartment are stored in ideal conditions. Vital nutrients, flavour and texture are retained for a long time – for noticeably more freshness.

DailyFresh

The spacious drawers in the fridge offer space for a lot of fresh food. The adjustable openings in the drawer ensure that humidity is retained efficiently. This results in fruit and vegetables staying fresh and crisp for noticeably longer.

Which freezing system would you like?
Long storage times for greater convenience

NoFrost

With the NoFrost system, you'll never have to defrost your Miele refrigeration appliance again. The circulation cooling system distributes cold, dry air evenly so that ice cannot form in the interior cabinet. Furthermore, ice deposits do not form on your frozen food and, without layers of ice on the interior, drawers can always be opened and closed easily. NoFrost offers maximum convenience for freezing food and saves the hassle of defrosting – forever.

ComfortFrost

With ComfortFrost, the freezer needs much less defrosting. The ice inside the appliance builds up much more slowly. This saves you the effort of frequent defrosting.

DuplexCool

The fridge and freezer have separate air circuits which ensure an optimum climate in both. In addition, there is no air exchange between the two areas. This prevents odours from food such as fish, onions or cheese from being transferred to other food in the freezer. DuplexCool ensures the safest storage conditions for your food in fridge-freezers.

Which convenience features would you like?

The product highlights* of Miele freestanding refrigeration appliances

PerfectFresh Active

A new approach from Miele to keep your food fresh! Every 90 minutes and whenever the door is opened, a fine water mist is sprayed into the PerfectFresh Active drawer. This creates a gentle layer of moisture on your food and keeps the air humidity perfect at all times – regardless of how full the refrigerator is. As a result, Miele's Perfect-Fresh Active freshness system creates the perfect storage conditions in your refrigerator.

Freeze&Cool

New possibilities: use the freezer as a fridge and benefit from even more storage space.

**Exclusive
to Miele**

FlexiLight 2.0

Entirely glare-free: the illuminated shelves can be custom-positioned in the fridge for maximum flexibility.

FlexiBoard

Particularly flexible: the FlexiBoard creates space for tall containers and preserves storage space in the rear.

**Exclusive
to Miele**

Fine adjustment of inner door

Adaptable: the position of the inner door shelves can be adjusted to make the best use of space.

Click2open

Opening made easy: even handle-free appliances can be opened with ease thanks to the lever action.

Miele MasterCool

High-end design and technology on a large scale

Impressive looks

The formidable appearance of MasterCool refrigeration appliances gives you an idea of the precision and devotion that was applied when selecting and working the materials. The inimitable appearance reflects this level of attention to detail.

Design at its best

The unique special features of the interior cabinet leave nothing to be desired. Horizontal lines emphasise the puristic design. The timeless design of the interior cabinet supports the perfect, glare-free illumination of the appliance.

Stunning lighting

BrilliantLight sets new standards within our MasterCool series. Multiple LED light strips perfectly illuminate the entire interior cabinet of the appliance, displaying the refrigerated food in the perfect light.

Unsurpassed quality

Perfection and precision of the highest quality. This begins when selecting the right materials. High-quality glass shelves, scratch-proof plastic and solid aluminium frames embody this high quality. Knowledge and experience are the best advisors on the path to high-end products.

GOLD
AWARD
2019

reddot design award
winner 2019

Award for design: the new MasterCool appliances from Miele.

Maximum convenience

MasterCool refrigeration appliances offer the best in terms of convenience each and every day, such as ideal food storage conditions, ice and water dispensing, a brilliant light concept and a simple user interface. MasterCool refrigeration appliances meet the exacting requirements of your everyday needs.

Miele MasterCool

MasterFresh freshness system – pure enjoyment and natural taste

DuplexCool Pro freezing system – long storage times for greater convenience

MasterFresh

Fresh food is the basis for wholesome, healthy living. Fruit and vegetables should be consumed as crisp and fresh as when purchased. But who has the time to buy fresh ingredients every day?

Apart from the quality of the food at the point of purchase, the right storage conditions are also important. They determine how fresh, tasty and healthy food still is when preparing it for consumption.

The drawers of your Miele MasterCool appliance provide the perfect climate for the gentle storage of your food. Thanks to the innovative MasterFresh function, the refrigerator temperature is particularly low, so that vitamins and minerals are preserved for a long time. The air humidity is also perfectly adjusted to suit fruit, vegetables, dairy products, fish and meat. This ensures that food stays fresh for up to 3 times longer.

DuplexCool Pro

The refrigerator and freezer have separate cooling circuits which ensure an optimum climate in both. In addition, there is no air exchange between the two areas. This prevents food in the fridge from drying out, and odours from fish, onions or cheese, for example, are not transferred to food in the freezer.

In addition to the DuplexCool functionality, DuplexCool Pro provides maximum cooling with two separate compressors – one for each cooling circuit.

DuplexCool Pro is therefore the professional solution as it provides the safest storage conditions for your food in fridge-freezers.

Which convenience features would you like?

The product highlights* of Miele MasterCool

Push2open

Convenient and reliable: a gentle press is all it takes to open the door of your Miele MasterCool appliance. This unique mechanism ensures maximum convenience – simply pull the door to open it further and take out the food you need. Thanks to Push2open, MasterCool appliances have an unobtrusive, minimalist design and can be flush-fitted into any handleless kitchen. Prefer a classic design? Push2open can easily be converted to Pull2open via the control field. In this case, the door won't respond to pressure – pull gently on the handle instead and the door will open automatically.

BrilliantLight

Soft and attractive: high-quality LED strips offer perfect illumination and a beautiful lighting mood.

MasterFresh

Food stays fresh for up to 3 times longer: the ideal storage temperature for fruit, vegetables, fish, meat and dairy products.

IceMaker

Produced quickly and stored: Miele's IceMaker has separate controls and can produce up to 150 ice cubes a day.

Ice/Water dispenser

Pure luxury: at the touch of a button you are treated to ice and chilled water from the Ice/Water dispenser.

Exclusive
to Miele

SommelierSet

Everything you need to chill glasses, prepare wine for decanting and condition open bottles to perfection.

Which convenience features would you like?

The product highlights* of Miele wine units

**Exclusive
to Miele**

SommelierSet

The wine unit is simply perfect for wine connoisseurs: with the unique SommelierSet, exclusively from Miele. Prepare fine wines professionally for decanting. Enjoy champagne and white wine from chilled glasses. Drink perfectly conditioned wine even from opened bottles. And have all the equipment you need for this ready at hand.

Temperature zones

Separate controls: up to three different types of wine can be stored at the same time at different temperatures.

**Exclusive
to Miele**

FlexiFrame Plus

Perfectly adjustable: even magnum bottles can be stored thanks to slats which can be repositioned in two directions.

**Exclusive
to Miele**

FlexiFrame

Just one movement: move individual slats so that large wine bottles are easy to store.

Selector bottle presenter

Presentation in style: the bottles appear slightly raised in the dimmed light of the wine unit.

NoteBoard

For individual labelling: every bottle rack features a removable, magnetic strip for labelling bottles.

What do the icons mean?

All icons for Miele refrigeration appliances at a glance

Energy efficiency

Energy efficiency classes A to F are indicated. Miele's best rating for freestanding refrigeration appliances is A*.

Sound emissions

States the exact sound emissions in decibel (dB).

Freshness system

Optimum storage with active humidification – fresh for up to five times longer even when only partially loaded.

Spacious drawers with adjustable humidity levels for fresh fruit and vegetables.

Spacious drawers for fresh fruit and vegetables.

Lighting

Individually adjustable glass shelf lighting for optimum illumination thanks to FlexiLight 2.0

Maintenance-free, energy-saving and excellent illumination of the interior cabinet.

My Ice

The automatic IceMaker with integrated water container for up to 100 ice cubes a day.

Freezer system

No need for defrosting thanks to the circulation cooling system.

Dishwashers

Innovation AutoDos: Automatic dispensing with integrated PowerDisk.

Superior cleaning system, unparalleled freedom!

Discover excellent cleaning results with AutoDos: the world's first innovative automatic dispensing system with integrated PowerDisk – developed by Miele. We developed our dishwashers and our exclusive powder granulate as a precisely coordinated system. Depending on the selected programme, the powder granulate is automatically dispensed – exactly the right quantity at exactly the right time. Repeated dispensing within a programme is also possible. A sensor in the Automatic programme measures the degree of soiling and adapts the dispensed quantity accordingly.

The new generation dishwashers offer maximum user convenience. You can choose to either use the automatic AutoDos dispensing system with integrated PowerDisk or dispense tabs or powder the traditional way via the dispenser chamber. You decide when and which detergent you use.

For around one month, you won't have to worry about your dishwasher having sufficient detergent whenever you start a programme, as the innovative dispensing technology with PowerDisk contains enough powder granulate for an average of 20 dishwashing programmes¹⁾. This gives you a new kind of freedom.

With Miele@home you can exploit the full potential of your Miele appliances and make your everyday life even smarter: the world's first autonomous dishwasher can be networked safely and conveniently, making it even easier to use and allowing you to benefit from the unique convenience that it offers.

¹⁾ In the ECO programme

What type of appliance would you like?

The construction types of Miele dishwashers

Miele offers different dishwasher construction types for your kitchen.

Fully integrated dishwashers

The entire appliance front is concealed either behind a kitchen furniture front panel or a stainless steel Miele front panel with a CleanSteel finish. This allows the appliance to be perfectly integrated into the design of your kitchen.

Semi-integrated dishwashers

The appliance front can be matched to the cabinetry of your built-in kitchen – for a completely seamless kitchen design. Alternatively, stainless steel front panels with a CleanSteel finish are also an option.

Freestanding dishwashers

Freestanding appliances have a hard-wearing lid that can be used as a worktop. As the appliance is not built in, homeowners can simply take it with them if they move and install it in their new kitchen.

Built-under dishwashers

Ideal as a replacement appliance in an existing kitchen. The appliance can be installed under a worktop. Built-under dishwashers are available in brilliant white and stainless steel/CleanSteel.

Eye level installation

Loading without having to stoop: all Miele built-in dishwashers can be installed at an ergonomic height.

For maximum convenience and perfect design harmony

The wide variety of installation options for Miele dishwashers

Miele FrontFit

All Miele built-in dishwashers can be installed at an ergonomic height. Miele FrontFit provides the right appearance: an innovative technique that reduces gaps between the kitchen fronts to the maximum. This creates perfect gaps and joints. The intelligent sliding mechanism makes operation very convenient.

For perfect gaps and joints

For a consistent look: the new Miele FrontFit technique ensures a perfect design in all installation situations.

Handleless dishwashers with Knock2open

Tap twice on the front of the appliance and the dishwasher door will open automatically – it does not require a handle.

Plinthless run of kitchen cabinets

An even more appealing design: thanks to FrontFit, Miele dishwashers can be installed without a plinth.

Which niche size is available in your kitchen?

Miele dishwasher sizes

Miele dishwashers are available in different heights and widths.
The perfect solution for your kitchen, every time!

Standard dishwashers

(81 cm high, 60 cm wide)

For the standard niche in the majority of traditional households with a building-under height from 81 cm.

XXL dishwashers

(85 cm high, 60 cm wide)

Built-under, semi-integrated and fully integrated dishwashers from Miele are also available as XXL models. They are suitable for kitchens with a building-under height of 85 cm and above. Ideal for new kitchens with a higher worktop. XXL dishwashers offer up to 25 % more loading capacity in the upper basket for greater flexibility and better loading options for items such as glasses, mugs and plates with a diameter of up to 23 cm.

Slimline dishwashers from Miele

(81 cm high, 45 cm wide)

Our 45 cm dishwashers are on a par with their bigger brothers: Miele's slimline 45 cm wide dishwashers also feature a cutlery tray, low energy consumption and a highly convenient basket design.

Ideal for households where space is at a premium, but which still require everything a Miele dishwasher has to offer.

Miele

PowerDisk
All in 1

AutoDos

**Exclusive
to Miele**

Superior cleaning system

Great results: AutoDos is the world's first automatic dispensing system with integrated PowerDisk¹⁾. Transforming the dishwasher and exclusive powder granulate into a finely tuned system, the PowerDisk dispenses detergent depending on the selected programme at

exactly the right time. Enjoy the freedom: the PowerDisk lasts for 20 dishwashing programmes²⁾, without having to replenish the reservoir. Furthermore, it always dispenses the right amount of powder granulate.

¹⁾ Patent: EP2798995, US9962062

²⁾ In the ECO programme

Which convenience features would you like?

The product highlights* of Miele dishwashers

Exclusive to Miele **FlexLine basket design**
Flexibility creates convenience: easy adjustment and flexible loading for the best cleaning results.

Exclusive to Miele **Miele@home**
Make your life smarter: thanks to Miele@home you can cleverly network your domestic appliances – for more options.

QuickPowerWash
Short programme: best cleaning results for normally soiled crockery in 58 minutes.

EcoPower technology
Saving water and energy: efficient use of resources thanks to the cleverly designed water supply.

Proven hygiene
Hygienically clean: all Miele dishwashers reliably remove over 99.9 % of viruses¹⁾.

* Features vary depending on model
¹⁾ According to certification by the Institute for Integrative Hygiene and Virology with respect to the removal of enveloped and non-enveloped viruses (e.g. coronaviruses, influenza or noroviruses) in the tested Hygiene and Intensive programmes, in all cases using PowerDisk/ UltraTabs. Details on the test criteria can be found at www.miele.com/g7000-c.

What do the icons mean?

All icons for Miele dishwashers at a glance

Energy efficiency

Energy efficiency classes A to G are indicated.

Sound emissions

The quietest dishwasher has sound emissions from just 38 dB in the ExtraQuiet programme.

Cutlery cleaning

The patented 3D MultiFlex tray¹⁾ offers perfect convenience for the highest demands. The height, width and depth can be perfectly adjusted.

Cutlery is also perfectly cleaned and protected in the dishwasher measuring 45 cm wide.

AutoDos

Automatic dispensing of detergent for perfect cleaning results and maximum convenience.

BrilliantLight

4 high-performance LEDs for perfect illumination of the interior cabinet.

Control panel concept

Quick and simple swipe operation on the fully integrated touch display.

Planning notes for KMDA 7476 and KMDA 7634

Models KMDA 7476 and KMDA 7634 feature a rotatable ECO motor with a flat ducting connection. All models can be operated either in vented or ducted recirculation mode using the appropriate accessories.

Checklist for KMDA 7476 and KMDA 7634 planning:

- Minimum depth of worktop is 600 mm
- Installation from cabinet width of 900 mm
- Observe max. casing depth of max. 200 mm
- For maintenance work it must be possible to remove the rear cabinet wall
- Minimum safety distance to easily combustible materials above 500 mm for KDMA
- Removable drip tray must be accessible
- The hob must be installed so that the drip tray is easily accessible and can be removed for cleaning.
- Minimum plinth height is 100 mm
- Miele recommends the DMK 150-1 for extraction mode
- Miele recommends the DUU 1000-2 for recirculation
- Airflow from the DUU 1000-2 should be directed into an open space where possible. A sufficient distance from walls, furniture, etc. must be observed.
- Some installation situations may require the plinth feet to be moved
- Delivered with direction of air discharge to the rear
- Direction of air discharge can be rotated to the right or left
- Air discharge collar is designed for flat ducting (222 x 89 mm)
- With a flat ducting height of 95 mm and a worktop depth of 600 mm, the drawers must be shortened. Drawer heights may vary. A fixed panel must be installed in the upper area of a drawer unit.
- We recommend using Miele's flat ducting components. Please note that they are not supplied with the KMDA. To simplify planning and installation, DFKS-x flat ducting sets are available to cover most installation situations.
- We advise against highly flexible ducting.

When installing the appliances, it must be ensured that they are accessible from below. Depending on the furniture manufacturer, incremental sizes may vary which results in different planning options.

KMDA 7476 and KMDA 7634 – installation drawings

- 7) Exhaust duct, right >220–222 x 89–90/R1–R19 (requires conversion)
- 8) Exhaust duct, left >220–222 x 89–90/R1–R19 (requires conversion)

KMDA 7476 and KMDA 7634 ventilation technology drawings

Installation in worktop with depth of more than 600 mm

KMDA 7476 FR, KMDA 7634 FR
Frame – Surface-mounted installation

- 1) For maintenance work, it must be possible to remove the rear cabinet wall. The cabinet wall and an adjoining room wall or a piece of furniture must be at least 110 mm apart to ensure a minimum safety distance for the ducting.
 - 2) Variable length of the spacer piece
 - 3) After installation, the removable drip tray must be accessible. Two quick-release catches on both sides have to be opened to remove the tray.
- x = Measure by which the worktop depth is greater than 600 mm

KMDA 7476 FL, KMDA 7634 FL
Frameless – Surface-mounted installation

- 1) For maintenance work, it must be possible to remove the rear cabinet wall. The cabinet wall and an adjoining room wall or a piece of furniture must be at least 110 mm apart to ensure a minimum safety distance for the ducting.
 - 2) Variable length of the spacer piece
 - 3) After installation, the removable drip tray must be accessible. Two quick-release catches on both sides have to be opened to remove the tray.
- x = Measure by which the worktop depth is greater than 600 mm

KMDA 7476 FL, KMDA 7634 FL
Frameless – Flush-fit installation

- 1) For maintenance work, it must be possible to remove the rear cabinet wall. The cabinet wall and an adjoining room wall or a piece of furniture must be at least 110 mm apart to ensure a minimum safety distance for the ducting.
 - 2) Variable length of the spacer piece
 - 3) After installation, the removable drip tray must be accessible. Two quick-release catches on both sides have to be opened to remove the tray.
- x = Measure by which the worktop depth is greater than 600 mm

KMDA 7476 and KMDA 7634 drawings, rotatable motor

The fan motor on the KMDA 7476/KMDA 7634 is rotatable. Both a side or rear exhaust duct is possible.

KMDA 7476 and KMDA 7634 drawings, accessories

DFKS-U (material number 11250350)

Flat ducting set for air recirculation, allowing ducts to be joined to cover the most common installation situations on all sides of the appliance with consideration of the various worktop depths.

Consisting: 2 x DFK-BV 90, 1 x DFK-BH 90, 1 x DFK-V, 1 x DFK-L, 2 x DFK-R1000, 1 x DFK-DB, 1 x DUU 1000-2,

KMDA 7476 and KMDA 7634 drawings, accessories

DFKS-A 1 (material number 11250360)

Flat ducting set for extraction, allowing ducts to be joined to cover the most common installation solutions.

Consisting of 1 x DFK-BV 90, 1 x DFK-R 1000, 1 x DFK-BH 90, 1 x DFK-A, 1 x DFK-AK90, 1 x DFK-DB, 1 x DMK 150, DMK 150-1

DFKS (material number 11306320)

Basic set for further individual installation situations
Consisting of 2 x DFK-BV 90, 1 x DFK-BH 90, 1 x DFK-R1000, 1 x DFK-DB,

Planning notes for KMDA 7272 and KMDA 7473

Models KMDA 7272 and KMDA 7473 feature Miele's Silence motor. This version has a round exhaust duct and is not rotatable. Alongside the usual extraction and ducted recirculation installation options, Plug&Play installation can also be used. A suitable model for the installation situation at hand must be chosen (e.g. for KMDA 7272):

	Extraction mode	Guided recirculation mode	Plug&Play mode
KMDA 7272 FR-A No accessories included Factory default settings: • Active carbon filter saturation indicator is disabled • Fan start-up process is adjusted so that the wall vent can be opened even in low operation mode.	✓ (Accessories needed: flat ducting components + wall vent e.g. Miele DFKS-AR)	–	–
KMDA 7272 FR-U Accessories included: • Plug&Play adapter • Active carbon filter Factory default settings: • Active carbon filter saturation indicator is switched on • Extended run-on time to dry the active carbon filter and fan unit	–	✓ (Accessories needed: flat ducting components + recirculation box e.g. Miele DFKS-UR; Plug&Play adapter is not required)	✓ ✓ (No other accessories required)
KMDA 7272 FL-A No accessories included Factory default settings: • Active carbon filter saturation indicator is disabled • Fan start-up process is adjusted so that the wall vent can be opened even in low operation mode.	✓ (Accessories needed: flat ducting components + wall vent e.g. Miele DFKS-AR)	–	–
KMDA 7272 FL-U Accessories included: • Plug&Play adapter • Active carbon filter Factory default settings: • Active carbon filter saturation indicator is switched on • Extended run-on time to dry the active carbon filter and fan unit	–	✓ (Accessories needed: flat ducting components + recirculation box e.g. Miele DFKS-UR; Plug&Play adapter is not required)	✓ ✓ (No other accessories required)

- ✓ ✓ Possible
- ✓ Possible – additional accessories required
- Programming has to be adjusted – additional accessories required

Checklist for KMDA 7272 and KMDA 7473 planning:

- Minimum depth of worktop is 600 mm
- Installation from cabinet width of 900 mm
- Observe casing depth of 200 mm
- In extraction and ducted recirculation mode, it must be possible to remove the rear cabinet wall for maintenance work.
- The removable cleaning hatch and access for intensive cleaning must remain accessible at all times.
- The hob must be installed so that the drip tray and the cleaning flap are easily accessible and can be removed for cleaning.
- In the case of extraction and ducted recirculation mode, the minimum plinth height is 100 mm.
- Miele recommends the DMK 150-1 for extraction mode.
- Miele recommends the DUU 1500 for ducted recirculation.
- Airflow from the DUU 1500 should be directed into an open space where possible. A sufficient distance from walls, furniture, etc. must be observed.
- Some installation situations may require the plinth feet to be moved.
- Air discharge to the rear (non-rotatable), round exhaust duct, 150 mm diameter.
- We recommend using Miele's flat ducting components. Please note that they are not supplied with the KMDA. To simplify planning and installation, DFKS-xR flat ducting sets are available to cover most installation situations.
- We advise against highly flexible ducting.

When installing the appliances, it must be ensured that they are accessible from below. Depending on the furniture manufacturer, incremental sizes may vary which results in different planning options.

Note for recirculation mode:

Please add the installation option to be used to the kitchen order. (Vented recirculation mode or Plug&Play installation)

Requirements and peripheral conditions for non-ducted recirculation (Plug&Play installation):

- The heat transfer coefficient to adjacent walls and floors should be no higher than 0.5 W/(m²K). If this is the case, ducting and a plinth box should be used. Further information is provided below and in the operating instructions.
- Adequate ventilation via the plinth must be guaranteed. To achieve this, the plinth panel must be shortened or cut-outs created. The cross-sectional area should be at least 425 cm². The minimum plinth height is 25 mm.
- The distance between the vent and the rear panel must be at least 25 mm.
- In the case of base units with a depth of more than 60 cm, special accessories include an extension set (DVS 150) to bridge the distance between the fan connection and the opening in the housing unit.
- A drilling template is provided with the appliance to assist in creating a cut-out in the rear panel with a diameter of 150 mm. Miele recommends the use of a compass saw to prepare the rear panel for installation. Further information on the template is provided below and in the operating instructions.
- The automatic fan run-on in Plug&Play mode should not be interrupted in order to ensure that residual moisture is expelled from the housing unit.

Further notes on the U value in non-ducted recirculation mode (Plug&Play installation)

Plug&Play operation is possible in younger or renovated buildings. If the adjacent wall or the floor is in contact with the ground or the outside air, it must have a heat transfer coefficient (U value) of ≤ 0.5 W/(m²K).

Material	Material thickness	U value (from 1995)
Solid wall (Vertical coring brick, floating brick or comparable porous or highly perforated materials)	≥ 30 cm	0.5
Solid timber wall (e.g. log cabin, prefabricated house, timber frame or timber panel wall with insulating filling)	–	0.4
Passive house (KfW 55, 40, 40 Plus)	–	0.15–0.2

The U values for other materials can be found on the websites of the German Federal Ministry for Economic Affairs and Climate Action and the German Federal Ministry of the Interior and Community. If you have any other questions about your building, please contact a construction expert or energy adviser.

Planning notes for KMDA 7272 and KMDA 7473

Plug&Play adapter

This accessory is supplied ex works with the following KMDAs:
KMDA 7272 FR-U, KMDA 7272 FL-U, KMDA 7473 FR-U, KMDA 7473 FL-U

The Plug&Play adapter included with the hob is required for operation in Plug&Play mode.
The rotating Plug&Play adapter is designed for various installation positions.

Installation depth	Installation situation	Drilling template number	Position
20 cm ¹	Flush-fit installation	1	1
	Surface-mounted installation	2	2
21 cm ²	Surface-mounted installation	3a	3
	Flush-fit installation	3b	

¹ The template is supplied with the appliance
² The templates can be found on the Miele homepage

Drilling template

This accessory is supplied ex works with the following KMDAs:
KMDA 7272 FR-U, KMDA 7272 FL-U, KMDA 7473 FR-U, KMDA 7473 FL-U

Drilling template printed on both sides, used to create the cut-out for the Plug&Play adapter with an installation depth of 20 cm.

Drilling templates used to create a cut-out for the Plug&Play adapter with an installation depth of 21 cm can be found on the Miele homepage.

Cut-out in rear panel for non-ducted recirculation (Plug&Play installation)

Where possible, make use of the drilling template included with the appliance in its original size. If you do not have the drilling template to hand, please follow the following instructions:

Flush-fit installation:

Image of drilling template, side 1. Not shown to scale.

- Measure the thickness of the worktop (C).
- Locate the centre of the long axis of the cut-out.
- Mark the point 183 mm to the right of the centre (A).
- Mark the point (D) below the right-hand end of line A ($121.5 \text{ mm} - C$ (worktop thickness)).
- Saw a hole with a diameter of 146–150 mm around this point.
- Connect the Plug&Play adapter in position 1.

Planning notes for KMDA 7272 and KMDA 7473

Surface-mounted installation:

Image of drilling template, side 2. Not shown to scale.

- Measure the thickness of the worktop (C).
- Locate the centre of the long axis of the cut-out.
- Mark the point 177.5 mm to the right of the centre (A).
- Mark the point (D) below the right-hand end of line A (123 mm - C (worktop thickness)).
- Saw a hole with a diameter of 146–150 mm around this point.
- Connect the Plug&Play adapter in position 2.

Surface-mounted installation – 21 cm installation depth:

View of the drilling template, side 3a. Not to scale.

- Measure the thickness of the worktop (C).
- Locate the centre of the long axis of the cut-out.
- Mark the point 173 mm to the right of the centre (A).
- Mark the point (D) below the right-hand end of line A ($121.5 \text{ mm} - C$ (worktop thickness)).
- Saw a hole with a diameter of 146–150 mm around this point.
- Plug&Play mode only: engage the Plug&Play adapter in position 3.

Planning notes for KMDA 7272 and KMDA 7473

Flush-fit installation – 21 cm installation depth:

View of the drilling template, side 3b. Not to scale.

- Measure the thickness of the worktop (C).
- Locate the centre of the long axis of the cut-out.
- Mark the point 173 mm to the right of the centre (A).
- Mark the point (D) below the right-hand end of line A (125.5 mm - C (worktop thickness)).
- Saw a hole with a diameter of 146–150 mm around this point.
- Plug&Play mode only: engage the Plug&Play adapter in position 3.

Installation with DVS 150 Plug&Play extension set

Flat ducting sections

Installation notes for SmartLine

Checklist for the installation of SmartLine elements:

- Induction wok cannot be installed on the same side of the countertop extractor as the vapour outlet
- When a countertop extractor is positioned between two gas elements, the discharge direction can only be to the right
- Minimum depth of worktop for discharge direction to the right (prepared at the factory) is 600 mm
- Minimum depth of worktop for discharge direction to the left is 665 mm
- Air discharge collar of the plinth fan is designed for flat ducting (222 x 89 mm)
- Ducting system from countertop extractor to the plinth fan is supplied with the appliance
- We recommend Miele's flat ducting system to extend the ducting system
- We advise against highly flexible ducting
- The countertop extractor's electrical wires must not be extended or altered. They have been certified as a fixed part of the appliance only. Non-compliance will void the warranty
- Removable drip tray for the countertop extractor must be accessible.
- Cable protection panel must be reversible
- Different casing depths of SmartLine elements must be observed
- When installing several SmartLine elements, an additional CSZL 7000 spacer bar must be fitted in between the individual elements
- Observe fixed panel
- For maintenance work it must be possible to remove the rear cabinet wall
- Minimum plinth height for plinth fan is 100 mm
- Miele recommends the DUU 1000-1 recirculation box for recirculation
- Only 1 countertop extractor can be connected per recirculation box
- If possible, the recirculation box should discharge the air into free space and it should be sufficiently far away from walls, cabinets or other furniture
- The exhaust air from several countertop extractors should be vented into atmosphere via separate vent paths
- Some installation situations may require the plinth feet to be moved

Planning notes for Black Levantar downdraft extractor

1. Design of the DAD 4x40

The DAD 4x40 Black Levantar downdraft extractor is a cooker hood that retracts down into the worktop and is fitted inside the base unit.

When the extractor is retracted, only the glass frame and the surface of the canopy complete with SmartControl touch panel are visible. The fan and the electronic module for the cooker hood are hidden inside the base unit.

When the extractor is extended, the extraction area at the top covers the entire width of the canopy. The Hood-in-Motion function pulls the cooker hood out 30 cm.

The 10-ply stainless steel grease filters are located behind the glass panel. The filters are fitted upright at an angle inside the panel. Held in place by magnets, the panel is pulled forwards for opening and then lifted up and out.

An additional condensate tray below the filter can collect approx. 100 ml of liquid. We recommend wiping the tray dry every time you use a cooking process that produces a lot of condensation.

Either disposable DKF 30-P Active AirClean filters or reactivatable DKF 30-R Longlife AirClean filters for recirculation mode can be fitted in the internal extraction area underneath the condensate tray. Each set contains 2 filters.

Thanks to the integration of the filter at the top and the adaptation of the electronic module, the downdraft extractor can be installed without the need for additional ducting to be laid. See Section 4. a) for more detailed information.

Planning notes for Black Levantar downdraft extractor

2. Combination and installation

a) Installation in the worktop

The downdraft extractor is installed in the worktop (inside the base unit behind a hob). The appliance's dimensions are as follows:

If necessary, a distance can be maintained between the DAD and KM. In this case, the following dimensional drawings apply:
Surface-mounted installation

- 1) Cut-out for vent ducting in unit floor.
- 2) Ensure that the worktop is sufficiently stable.

Technical drawing of a rectangular plate with a circular hole and a rectangular slot. The drawing includes dimensions in millimeters and specific tolerances.

Overall Dimensions:

- Overall width: 920 (DAD 4840)
- Overall height: 940 (DAD 4940)

Slot Dimensions:

- Slot width: 815
- Slot depth: 106
- Slot position from left edge: ≥ 30 (Callout 2)
- Slot position from right edge: $\leq R4$ (Callout 3)

Hole Dimensions:

- Hole diameter: $\varnothing 160$
- Hole position from slot center: 90
- Hole position from top edge: 10

Callouts:

- 1: Points to the circular hole.
- 2: Points to the slot width dimension.
- 3: Points to the corner radius dimension.

Detail Views:

- Two circular insets show detailed views of the corner fillets.
- Each inset shows a corner with a radius of $5,5^{+0,5}$.
- The left inset shows a solid corner.
- The right inset shows a corner with a hatched pattern.

- It is possible to install the KM and DAD in a shared cut-out. The downdraft extractor must be delivered or retrofitted with the requisite accessories (DWL 80) for this purpose. Information on this subject is available separately. The following dimensions apply in this installation scenario:

Technical drawing of the DAD 4840 and DAD 4940 door handle assembly. The main view shows a side elevation with dimensions: total width 896 (DAD 4840) and 916 (DAD 4940), total height T, handle height 120, handle offset 2, mounting plate thickness 7, mounting plate width 90, mounting plate offset 10, and mounting plate depth ≥ 30 . A circular hole with diameter $\varnothing 160$ is shown. A detail view shows the mounting plate with dimensions 916 / 936 and T.

- [illegible]

- 331

Planning notes for Black Levantar downdraft extractor

b) Panorama hobs

The DAD 4840 can be combined with panorama hobs including the KM 7684 FL. The advantage of this is that both appliances can be accommodated in a base unit 60 cm deep. To create the necessary space, the depth of possible drawers is reduced, but up to 37.5 cm is permitted depending on the design of the base unit.

Flush-fit or surface-mounted installation in a 60 cm deep unit with distance / without distance

1. Only necessary if flat ducting is laid under the cabinet or the DUU 600 recirculation box is used.
2. Exhaust duct, diameter 150 mm.

1. Exhaust duct, diameter 150 mm.

1. Exhaust duct, diameter 150 mm.

3. Installation based on operating mode

a) Recirculation as Plug&Play option

In what is known as Plug&Play operation, the filtered air is routed into the plinth. Additional pipework and a plinth box are not fitted. To use the downdraft extractor as a Plug&Play appliance, please note that the heat transfer coefficient must not exceed 0.5 W/(m²K). If it does, a ducting system and a plinth box must be laid to prevent possible build-up of moisture in the plinth.

Sufficient ventilation of the plinth area is important. To achieve this, the plinth panel can be shortened or gaps can be cut into it. The cross-section of the openings cut into the panel should be at least 425 cm². Please note that the performance of the cooker hood will be reduced and the noise level increased depending on the height of the plinth.

In addition, Plug&Play operation must be activated so that the cooker hood will run on in order to remove possible moisture. This procedure and the associated run-on times are described in the operating and installation instructions.

1. DUP 150

b) Recirculation with additional plinth box and pipework (planning example)

If Plug&Play is not possible or not required, the Miele flat ducting system can be laid in the plinth and then the air can be guided out of the plinth with the DUU 600 plinth box. The DUU 600 is not fitted with an active carbon filter.

- 1 DFK-AK 90
- 2 DKF-R 1000
- 3 DKF-BH 45
- 4 DUU 600

Planning notes for Black Levantar downdraft extractor

- 1 DFK-AK 90
- 2 DFK-R 1000
- 3 DFK-BH 45
- 4 DFK-A
- 5 DMK 150-1

c) Extraction mode

The DAD 4x40 can also be used in extraction mode. The Miele flat ducting system can also be used for this purpose.

4. Tips on use:

To assist the downdraft extractor with extraction, cookware should always be placed as close as possible to the extraction opening. With open pots, a lid should be placed at an angle and a wooden spoon should also be placed between the pot and the lid.

Planning notes for ceiling extractors

Distance between hob and cooker hood

The distance between the ceiling extractor and hob should be between 70 cm and 130 cm. We do not recommend exceeding the maximum distance as the vapour extraction performance is significantly reduced as the distance increases. Cold hobs, such as induction hobs or electric hobs, do not help vapours to lift up as much as gas hobs, for example. The vapours cool down more quickly and condense while rising. Condensed elements of the vapours do not reach the cooker hood's collection zone and fall back towards the floor.

Hob heating types and vapour collection

Due to the different types of heating in hobs, the way in which vapours rise can differ (thermal lift).

Cold hobs: In hobs that work with low thermal support in the cooking zones (e.g. electric and induction), the vapours are mainly supported by the temperature of the heated medium while rising. The rising vapours, which have a temperature of around 200 °C, cool down as they move towards the ceiling because they mix with the ambient air.

Some elements of the vapours condense and do not reach the cooker hood's suction zone. The condensed elements that fail to reach the cooker hood's extraction zone fall back down again. The rising vapours of these colder hobs are visible and develop in a cloud shape.

Hot hobs, e.g. gas hobs, provide high thermal support to the rising vapours because they use open flames. Temperatures up to 1100 °C are reached at the tips of the flames from the gas hob, which significantly increase the speed of the rising vapours and support thermal lift. The vapours are not usually visible. You usually just see the air “flickering” and the vapours rise at high speed.

Planning notes for ceiling extractors

Important:

Negative impacts during vapour extraction:

- Disruptive flows of air in the room affect the vapours, e.g. a draft
- Cooling of the rising vapours – Vapours do not reach the cooker hood
- Climate: The room and canopy are cold – Condensation forms
- Relative humidity in the room is too high – Condensation forms quickly on cold objects

Additional impact zone if items are suspended from the ceiling

If the ceiling extractor is used in rooms with high ceilings and the ceiling is lowered in the cooker hood area, a suitable impact surface must be ensured in the area around the edge of the cooker hood. The size of this area is calculated from the distance between the hob and the ceiling extractor around the outside of the cooker hood. The distance between the cooker hood and ceiling extractor is multiplied by a factor of 0.3. This gives you the size of the surrounding impact zone.

Positioning of a ceiling extractor above a hob

To ensure the most effective vapour collection performance possible, the distance between the hob and cooker hood is not the only important factor; the cooker hood also has to be positioned accurately above the hob. The ceiling extractor should be positioned in the middle above the hob. Any displacement could reduce the performance of the cooker hood.

Ceiling extractors as a recirculation variant

If the ceiling extractor is used in conjunction with the DUU 2900 recirculation box, the distance between the recirculation box and ceiling extractor must be at least 300 cm if both appliances are at the same level.

If the recirculation box is installed laterally in a suspended ceiling, it is important to note that the DUU 2900 must be installed in a way that ensures the discharged air cannot have a negative impact on the vapours rising from the hob.

DA 2808 with external fan

If a greater distance needs to be bridged, an external version of the ceiling extractor can be used. This decreases the appliance's installation height to 175 mm. This solution blends in perfectly, even in rooms with a standard ceiling height.

Any external fan available from Miele can be used. To reduce noise levels in the kitchen, we recommend installing an external fan 5 m or more away.

 - 4) Wall unit can be fitted with partition wall after installation.
- Compartments for the grease filters, and for the charcoal filters in recirculation mode, must remain accessible.
- The height of the wall unit and the cut-out dimensions must take into account any accessories fitted (e.g. silencer, recirculation hood conversion kit, DSM module).

Installation drawings for refrigeration appliances and wine units

Technical cross-section drawing of a multi-story building facade, showing structural details and dimensions. The drawing includes a vertical dimension line on the right side with the following values:

Section / Feature	Height (mm)
Top section (above 451)	80
Section 353	78
Section 451	79
Section 353	77
Section 449	84
Section 323	

Technical cross-section drawing of a three-door refrigerator. The drawing shows the internal layout with three drawers at the bottom and three shelves above. Dimensions are indicated on the right side:

- 139 (Total height)
- 133 (Height from top shelf to top door)
- 449 (Height from bottom shelf to bottom door)
- 77 (Height of the bottom door)
- 323 (Height from bottom shelf to top shelf)
- 84 (Height of the top door)

Technical drawing of a cabinet. The top view shows a rectangle with dimensions 985 mm (width) and 4025.5 mm (depth). A small rectangular section on the right side has a width of 25 mm and a depth of 15 mm. The side view shows a cabinet with a height of 500 mm and a depth of 40 mm. A cutaway view of the cabinet door is shown, with a shaded area indicating the internal structure. The cutaway view is labeled with a circled 'Q' and a circled 'R'.

3) No electrical connections permitted in this area

** Appliances with metal front

Technical drawing of a window frame cross-section. The dimensions are as follows:

- Total height: 3725 mm
- Top rail thickness: 25 mm
- Main frame body height: 1909 mm
- Bottom rail thickness: 27.5 mm
- Frame material: ALU 1000

Installation drawings for refrigeration appliances and wine units

1. **Side-by-Side:** if the appliances are to be installed next to each other without a partition wall or a panel between them, they will need to be joined together. You will need the "KSK 2001 Side-by-Side installation kit including side panel heater" (material number 10.984.120) for this purpose. A VDE 0701/0702: 2008 test is required after installation. Important: parallel earth connection!

The partition wall must be at least 160 mm thick. The "Side-by-Side installation kit including side panel heater" is also necessary if the partition wall or panel is less than 160 mm thick. The installation niche width must be increased by 4 mm in this case due to the side panel heater.

① With partition wall ...

① KSK 2001

② Niche for appliance A

③ Appliance B,
A = niche dimension for appliance A,
B = niche dimension for appliance B

If the distance between the appliances is >160 mm, you do not need a Side-by-Side installation kit with side panel heater.

2. Air vents in the plinth ensure ventilation of the appliances. The air vents above the plinth panel must not be covered or obstructed. The plinth panel has a height of 102 mm and should be at least 13 mm thick (19 mm recommended). The plinth return should be at least 71.7 mm to ensure sufficient air circulation. More detailed diagrams can be found in the installation drawings for each appliance.
3. **Mains water connection:** the water pressure must be between 2 and 8.25 bar.
The stainless steel hose is 2 m long.
4. A stopcock must be provided between the stainless steel hose and the household water supply to ensure that the water supply can be cut off if necessary.
5. The surrounding walls of the installation niche must be at least 16 mm thick.
6. MasterCool sample dimensions
 - ① = KSK 2001 Side-by-Side installation kit including side panel heater already installed
 - ② = Plinth 102–132 mm
(height-adjustable by up to 30 mm)
 - ③ = Total niche width 1220 mm (458 mm + 762 mm)

MasterCool

Miele service portfolio for MasterCool

Installation: our sales order processing team will coordinate all of the delivery details with you. We offer free delivery to the point of use for MasterCool appliances. This includes site access and delivery incl. contractual services to the point of use, as well as unpacking and taking away and disposing of the packaging.

Furthermore, our service technician will install the appliances in the designated niche. It must be ensured that all connections (electrical and water connections as per diagram) are present, the necessary niche has been planned correctly, all accessories required for installation (e.g. KSK 2001 Side-by-Side kit) are present and all necessary work in relation to the kitchen furniture has been completed.

Delivery and Installation Service

When convenience can be relied upon

We want to ensure that you have a smooth start with your Miele appliances.

We can deliver your new appliances to your home where they will then be installed by a Miele specialist as you require. You also receive valuable tips and advice on how to use them.

Having your appliances commissioned professionally ensures that they will work perfectly and is also a good opportunity for you to get familiar with the wide range of functions that they offer. Miele wants to support you right from the outset and ensure that you get the most out of your appliances.

If you wish, we will also properly dispose of your old appliances for you.

Get started quickly with tips from the experts

Your appliances are installed by a Miele specialist who will also instruct you on how to operate them. During this hands-on training you will get valuable tips and advice.

Be on the safe side right from the start

The service we offer ensures that your appliance is installed correctly, meeting the prerequisites of our manufacturer's warranty. For added peace of mind, an electrical safety check is carried out at the same time.

Miele specialists make all the difference

Nobody knows our Miele appliances better than our technicians. Entrust your appliances to the company who built them.

Further information on our Delivery and Installation Service can be obtained from miele.co.uk/service.

Individual Product Consultation

When information creates excitement

Miele appliances are high quality and innovative – by purchasing Miele, you have opted for the best. To ensure that you enjoy your appliances and their wide range of functions even more, we would like to introduce you to an attractive offer: Individual Product Consultation.

This service is tailored to suit your personal needs. It offers you comprehensive advice on the functions and optimum use of your Miele appliances in the comfort of your own home.

Together we will programme your appliances to suit your personal needs. We will also explain how the special functions work and give you advice on maintenance and operation. We will also show you how to achieve the best results and give you valuable tips to ensure that you enjoy your Miele appliances for a very long time. With our Individual Product Consultation “Plus”, we go a step further by cooking up to three dishes with you.

Personal advice

Miele experts will give you tailored advice about your appliances in the comfort of your own home.

Setting your favourite programmes

With customised programming, your appliances can be set up to perfectly suit your personal requirements and preferences.

Tips and tricks for perfect results

You will be given helpful information on how to use and look after your appliances.

Cooking together

If you want, we will cook with you and show you how to make your traditional family favourite dishes as well as new ones, whilst taking advantage of the many functions that your new Miele appliances offer.

Further information on our Individual Product Consultation can be obtained from miele.co.uk/service.

Maintenance Service

When longevity is part of our philosophy

Miele appliances are tested to the equivalent of up to 20 years' service life. Miele would like to support you in using your appliances for as long as possible in the interest of sustainability and the sparing use of resources.

The Maintenance Service contract provides your appliances with professional maintenance checks by the Miele Customer Service Department. A diagnostic system, specially designed by Miele, is used to check your appliances and make sure they are kept up to date.

As well as making sure your appliances are in good working order, they will also be cleaned thoroughly using Miele care products. You will also be provided with valuable advice on how to operate your Miele appliance.

Appliances hold their value

Thorough cleaning and maintenance work carried out by a Miele expert ensures that your appliances are always in perfect condition.

Perfect results

Regular care, maintenance, functional tests and programme updates guarantee excellent results at all times.

Valuable tips

Miele experts are on hand to provide you with tips and tricks on everything regarding the optimal use of your appliances.

Further information on our Maintenance Service can be obtained from miele.co.uk/service.

Miele Customer Service Department

Your partner for all servicing needs

When you buy a Miele appliance, you choose longevity and the best in quality. If, however, you require any help, the Miele Customer Service Department can provide rapid and reliable assistance.

Repairing a high-end Miele appliance is a good idea even as the appliance gets older and is a conscious decision for more sustainability.

We consider perfect service to be more than simply providing expert assistance in the event of technical problems. Miele provides support from delivery and installation right through to when appliances are commissioned.

Never very far away

Blanket service coverage throughout the country ensures that Miele technicians and selected service partners can be with you in next to no time.

Proficient

Our technicians are Miele domestic appliance repair specialists, guaranteeing a quick and professional repair.

Sustainable and efficient

Thanks to intelligent preparation, we carry out 90 % of all repairs during our first call-out visit. This not only saves time, it also benefits the environment as a second visit is not necessary.

Reliable supply of spare parts

Not only can you expect legendary Miele quality from original Miele spare parts, you can also rely on them being readily available – even many years after purchasing your appliance.

Contact made easy

You can request a call-out either online at miele.co.uk/service or by phoning 0330 160 6600. Contact us by phone:
Mon–Fri 8.00am – 6.00pm and
Sat 8.00am – 4.00pm

Further information on these topics is available from our website at miele.co.uk/service.
