Kids

NATURALNESS RIGHT
FROM THE START.

KIDS FURNITURE MADE OF SOLID WOOD.

FOR NATURALNESS RIGHT FROM THE START.

Why are we making kids furniture from real trees? Well, what did you love to climb on when you were a child? We love children, and we know how important a natural environment is for them to grow up healthily. That is why we manufacture our kids furniture from pure solid wood, assemble it without formaldehyde and finish the surfaces exclusively with natural oil. This keeps the wood free from harmful substances and it retains its many positive properties.

We only use wood from sustainable forestry and ensure the highest standards in our domestic production – both in terms of environmental protection and quality – because not only do we want to provide children with high-quality furniture, we also want to leave them a world worth living in. For us, sustainability also means producing furniture with a long life. For this reason, our kids furniture is expandable and adaptable. It grows with your child and remain faithful companions for many years. The oiled wooden surfaces can be repaired. Even the traces of years of use as well as small dents and scratches can be removed. This means that the furnishings of the kids' room can be easily passed on.

Dr Georg Emprechtinger,
CEO and owner, TEAM 7

A SAFE PLACE TO GROW UP.

IN HARMONY WITH NATURE.

Real wood radiates something very special: this natural material exudes warmth, security and comfort. It lives and breathes. Thanks to its open-pore surface, wood can absorb moisture and release it again when needed, leaving a pleasant room climate perfect for sleeping, playing and cuddling.

Wood is also naturally accustomed to all sorts of challenges and is extremely robust. An unbeatable advantage when the little adventurers start to let their imagination run wild. To ensure that our kids furniture is up to these challenges, it is tested in our own test lab right from the start. In addition, the bed system, crib and baby bed, tandem bed, desk and swivel chair as well as the wall module are all certified with the GS mark for "Tested Safety".

Corners and edges are rounded where necessary and blend harmoniously into the otherwise linear, timeless design. The two-handed operation of the tilting desk top reduces the risk of pinching to a minimum. At the same time, the meticulous craftsmanship brings the pleasant texture of pure solid wood to life.

Kids furniture experiences a lot over the years. It must also adapt to the different requirements placed on it as your child grows. But one thing always stays the same: a child's room isn't just a bedroom. It is a playroom, a study room, a place of retreat. It's a child's realm, designed to fire their imagination and at the same time give them peace and quiet to recharge their batteries. We have developed our **kids** range so that you can create such a place at home – with functional kids furniture made of pure solid wood that offers plenty of scope for creative design options.

learning playing

Drawing, arts and crafts, homework: designed to be just like a first home office, the **kids'** room fulfils all the requirements for concentrated and creative work from an early age.

Children love to invent their own worlds and immerse themselves in them. They also love to move and run around. Our **kids** furniture is the perfect companion for them at all times.

resting recharging

Restful sleep is especially important for a child's development. Surrounded by genuine solid wood, children find a natural sleeping place in the **kids** bed where they can calm down and relax.

With **kids**, the kids' room also becomes a place of retreat where they can take a little time out. Here, they can enjoy activities like reading books or digital interactions.

baby bed

Its most striking feature: the simple design. A minimalist, solid wood frame forms a strong base for this timeless favourite. The baby bed is made of a special knitted fabric that makes the piece lightweight and underpins the airy feel. High-quality wheels and the light weight make our baby bed mobile and flexible for when you want to move it from one living area to another, for example. Disassembled into just a few elements, it is also easy to transport as a spare travel crib thanks to its flat packing size.

WITH OUR BABY
FURNITURE
NATURE IS THERE
FROM THE START.

Rent me, baby!

With our rental service, you have the option of using the **kids** baby bed for only as long as you actually need it. Then you simply give it back. This saves money and, above all, valuable resources, as the baby bed and the materials it is created from are used again and again and thus kept in circulation. You can find out more details about our baby bed rental service from selected TEAM 7 partners in your area.

crib

Comfort for everyone. The height-adjustable slatted frame allows the crib to be adapted to your child's mobility. In the beginning, you can set the mattress level higher so that you do not have to bend down as far to reach your child. Later, it can be lowered to increase the safety as your toddler becomes more mobile. Two removable side bars enable older children to climb out of the crib on their own. When you no longer need the crib, it can be easily transformed into a cosy sofa – the perfect place to snuggle up and tell stories.

wall module

The space-saving wall-mounted module fulfils two functions: changing station and mini-office. The wall module can also be equipped with optional features, such as LED lighting and power sockets, meaning it can later be transformed into a small, practical workspace. The matching mobile pedestal offers space for nappy-changing, painting, crafting and writing utensils.

IDEAL FOR WIPING AND SURFING.

Thanks to its shallow depth, the wall module takes up very little space when not in use, so it integrates perfectly into the room. For comfort and safety, the soft-close flip top opens and closes smoothly.

YOUR CHILD GROWS AND GROWS? SO DOES OUR FURNITURE.

The kids' room is a small realm where children can let off steam, be creative and relax. As they grow older, however, their needs change rapidly. TEAM 7 **kids** adapts flexibly and grows with your children. Timeless and understated in design, this child-friendly furniture transforms over the years into cool furnishings for the teenager's room. And even after that, the sleek furniture can be a beloved companion in their first flat or in the guest room.

bed system

From a single bed to a den bed, loft bed or bunk bed and back again: with TEAM 7 **kids**, it's all child's play. Clever add-ons make the **kids** bed fantastically versatile.

Timeless in design, the single bed can be used as a basic bed or in the version with head- and footboard, catering to both kids and teenagers alike. An integrated safety rail protects the little ones from falling out. If desired, a shelf for an alarm clock, books and much more can be mounted on the long side of the bed.

The single bed can also be extended into a den bed or a loft bed. This creates a protected space underneath that can be used as an additional play area or a cosy place of retreat.

NEED MORE STORAGE SPACE OR A LARGER PLAY AREA?

BOTH, OF COURSE!

Bed, storage space and storage shelf: the **kids** bed has the right combination for every situation.

The optional platform for the single or the bunk bed can be designed to run down all four sides of the bed to suit your needs. It offers more storage space in the kids' room thanks to generous drawers and the fold-out corner module. At the same time, the platform creates practical surfaces that turn the bed itself into a play area.

When the family is expecting another member, two single beds can be combined to form a bunk bed if desired. If the children get their own rooms later down the line, the bunk bed can be converted back into two single beds. An integrated safety rail offers protection when things get wild.

VISITORS MAKE THE ROOM TWICE AS COSY!

upholstered backrest

The comfortable upholstered backrest can be flexibly designed for many places in the kids' room, for example on the wall next to the bed. This creates additional cuddle and reading corners and makes the kids' room even cosier.

bed chest

Practically stowed away but always to hand: bedspreads, additional bed linen and much more are perfectly stored in the spacious bed chest. The high-quality cushioning mechanism guarantees that a lid won't fall on someone's head while tidying up.

tandem bed

Is the short visit turning into a sleepover? No problem with the tandem bed! It can be converted from a single bed into a comfortable double in next to no time. When the guest returns home, the additional lying surface is stored under the bed again to save space. See you next time!

Our tandem bed will also feel very comfortable in your guest room.

HERE, EVEN TIDYING UP IS CHILD'S PLAY.

Like a child, the need for storage space also grows over time. The furniture elements from our **kids** programme offers just the right options here to expand the range according to demand at any time. The sophisticated design helps children learn to develop an organised system of order on their own.

wardrobe & shelves

Based on a shared element system, the wardrobe and shelves can be perfectly combined with each other, turning planning into child's play. Drawers and hinged doors in the bottom part of the shelving unit offer easy access for children, allowing them to conveniently tidy away their toys. A mobile rolling drawer can be used anywhere in the room and disappears neatly back into the cabinet afterwards. Lovingly handcrafted wooden handles also make it easy for small children's hands to open and close.

alcove

The upholstered alcove is the perfect retreat to rest and read. Surrounded by pure solid wood, this space radiates a special feeling of warmth and security. The LED lighting creates a pleasant lighting atmosphere.

THE RIGHT WORKSPACE FOR ALL AGES.

workspace

Once they start school, parents begin thinking about a suitable desk and a matching chair for their child. Especially for children, the flexible adjustment options of our **kids** furniture are particularly valuable in order to provide the best possible support for a healthy posture and your child's development.

desk

The TEAM 7 **kids** desk is adjustable in height and adapts to individual ergonomic needs – from children to young adults. And it's also very adaptable all around: integrated cable management, a drawer and a partially tiltable table top for additional comfort.

swivel chair

Relaxed sitting that's also kind to the back can significantly influence a child's well-being. This is why you can easily adjust the seat height, seat depth and backrest of our swivel chair. The flexible click mechanism in the backrest and the easy-to-use adjustment ring make setting the optimum seating position child's play.

desk pedestal

A desk seldom comes by itself. Our desk pedestal is the perfect companion, which can be chosen in two widths depending on your storage space requirements.

decorative shelf

Individual functional wall shelves expand the design options in the kids' room. When two shelves are connected, they can be mounted on the safety rail and moved along the side of the bed. The ideal place for stuffed animals, books and other valuable treasures that always need to be within easy reach. Colourful elastic bands ensure that everything stays in place.

OUR FURNITURE IS SIMPLE AND TIMELESS. AND THE COLOUR SHINES OUT ON ITS OWN.

real wood

We use only wood from sustainable forestry sources. With TEAM 7 **kids**, alder is our preferred wood type. Its simple wood pattern makes the kids furniture timeless companions, adaptable to all colour and thematic changes. You have the choice between the white oil finish, giving the surfaces a very light appearance, or the natural oil version, emphasising the warm red-golden tint.

TEAM 7's first solid wood furniture was made of alder, and for good reason – it corresponds perfectly to our ecological principles because the native wood type is hard-wearing and quickly renewable. We use it to create furniture that will last at least as long as it takes a new tree to grow.

durable fabric

Here we really are talking about a very long life. Because our Ripley fabric is made entirely of recycled material, which comes from old clothes. That conserves valuable resources and extends the life cycle of these materials – all in line with our recycling mentality. Choose from TEAM 7 **kids** eight colour variations in shades of brown, grey, beige and blue, which combine wonderfully with the natural wooden surfaces.

You can add fresh colour accents with the practical and replaceable elastic bands of the upholstered backrest and decorative borders in water blue, forest green or flame red.
